Product Description

What is AMPK activator over 99% pure white powder AICAR 50mg CAS 2627-69-2?

AICAR, 5-aminoimidazole-4-carboxamide 1- β -D-ribofuranoside, also known as AICA Riboside or Acadesine, is an Amp-activated protein that is permeable to cell membranes. Kinase (AMPK) activator. AMPK is a key protein in metabolic regulation. When energy supply is insufficient, AMP/ATP ratio is up-regulated, and AMPK is activated, inhibiting anabolism. AICAR activates AMPK without affecting ATP, ADP, and AMP levels.
