

Anabolic 99% Bodybuilding Testosterone Powder 50mg CAS 57-85-2

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1 kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25kg Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Bodybuilding Anabolic Steroid Testosterone Propionate 50mg
- Outlook: White Powder
- CAS: 57-85-2
- MF: C45h55n9o6
- MW: 344.49
- Storage: -20-4
- Highlight: **CAS 57-85-2 Testosterone Powder , Anabolic Testosterone Powder , 50mg testosterone propionate bodybuilding**

Product Description

What is Bodybuilding Anabolic Steroid Testosterone Propionate 50mg?

Basic Information form:

Product Name	Bodybuilding Anabolic Steroid Testosterone Propionate 50mg
Cas No.	57-85-2
Assay	99%
Appearance	White powder
MF	C ₂₈ H ₃₈ O ₂
Shelf Life	2 years
Attention Terms	-20-4

Brief Introduction:

Testosterone Propionate is a steroid hormone from the androgen and is found in mammals and other vertebrates, testosterone Propionate is primarily secreted in the tests of males and the ovaries of female, although small amount are also secreted by the adrenal glands, testosterone Propionate is the principle male hormone and an anabolic steroid. Testosterone Propionate plays a key role in the development of male reproductive tissue such as the testis and prostates. In addition, testosterone Propionate is essential for health and well-being as well as the prevention of osteoporosis, testosterone Propionate is conserved through most vertebrates, although fish make a slightly difference from called 11-ketotestosterone.

Testosterone propionate is a type of testosterone commonly used for injection. The added propionate will slow the rate of testosterone release from the injection site, but only for a few days. As a result, testosterone propionate has a relatively faster action than other testosterone esters such as heptanate, cyclopropionate, or heptanate.

**Application:**

For the Medical field

It is mainly used in male cases of androgen insufficiency, as well as problems usually surrounding low testosterone levels, such as decreased libido and impotence in adults, and undescended testicles in adolescents and young adults. Treatment of female menopause, menorrhagia (heavy menstrual bleeding), menstrual tension, chronic cystic mastitis (fibrocystic breast), endometriosis and hyperlactation.

Function:

There are principally two desirable effects of Testosterone:

1. Physical / Athletic performance enhancement (endurance, strength, faster regeneration) physique enhancement (muscle buildup, fat loss)

The rest of desirable testosterone effects that an individual might experience during the steroid cycle, include: increase in collagen synthesis and bone mineral content. Collagen is the protein-based construction material for connective tissues throughout the body (the ligaments, tendons, cartilage, joints, and bones).

2. Heightened self esteem.

(1) Deeper (manly) voice

(2) Darkening and thickening of body hair

(3) Increase in levels of IGF-1 and MGF hormones (which also promote muscle growth),

(4) Increased hemoglobin (red blood cell count) anti-catabolic effect on muscle tissues by way of acting as an anti-glucocorticoid.
