

Medical Grade White Raw Powder Testosterone Enanthate CAS 315-37-

7

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Febr Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Bodybuilding Testosterone Steroids Powder
Testosterone Enanthate Raw Powder
- Other Name: Test Enanthate
- Appearance: White Powder
- Cas No: 315-37-7
- MF: C₂₆H₄₀O₃
- MW: 400.6
- Purity: 99%min
- MOQ: 1KG
- Highlight: **Medical Testosterone Enanthate Raw Powder ,
White Testosterone Enanthate Raw Powder ,
CAS 315-37-7 testosterone steroids

Product Description

What is Bodybuilding Testosterone Steroids Powder Testosterone Enanthate Raw Powder?

Basic Information form:

Product Name	Bodybuilding Testosterone Steroids Powder Testosterone Enanthate Raw Powder
Cas No.	315-37-7
Assay	99%
Appearance	White powder
MF	C ₂₆ H ₄₀ O ₃
Molecular Weight	400.6
Melting point	34 ~ 39°C

Brief Introduction:

Testosterone Enanthate is a long-acting injection of testosterone. After deep intramuscular injection, entanate continues to release testosterone into the bloodstream for about 2 to 3 weeks. In order to maintain normal physiological levels of testosterone during androgen replacement therapy (TRT), injections of TESTOSTERONE heptanoate are usually required at least once every two weeks. In medical practice, most doctors prefer weekly injections. Like all testosterone injections, Testosterone Enanthate is favored by athletes for its ability to promote strength and growth of muscle mass.

The Enanthic acid has been attached to the 17- β hydroxyl group. The esterified form of testosterone is less polar than free testosterone and is absorbed more slowly from the injection area. Once in the blood, the ester is removed, resulting in free (active) testosterone. The esterified form of testosterone is designed to extend the window for therapeutic effect after administration, and the esterified steroid product can be injected less frequently than the free (unesterified) steroid.

**Application:**

For Medical Field:

Testosterone Enanthate is most commonly used clinically to maintain the normal levels of testosterone needed by adult men whose androgen levels are too low. Low androgen levels are characterized by low libido, emaciation, small muscle mass, and daily mental drowsiness. Testosterone Enanthate is also used to treat abnormal testicular development and delayed puberty in adolescent males.

For Sports Field:

Testosterone Enanthate is best suitable for muscle builders and sportsmen looking to gain the advantages of efficiency improving medications without the severe adverse reactions.

Function:

For Man

Applied to sexual inadequacy, sex organ dysplasia, infertility, cryptorchidism and infertility.

For Woman

Functional uterine bleeding

Climacteric syndrome

Breast cancer

Genital cancer

Liver cirrhosis

Aplastic anemia

Osteoporosis

Other wasting disease.

Package and Shipping of Bodybuilding Testosterone Steroids Powder Testosterone Enanthate Raw Powder

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

shipping:

With 3-5days after your payment

FAQ of Bodybuilding Testosterone Steroids Powder Testosterone Enanthate Raw Powder
