

99% Sarms Powder Endurobol GW 501516 for Muscle Building CAS 317318-70-0

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GW 501516
- Minimum Order Quantity: 1kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25kg/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Muscle Building SARMS Raw Powder GW 501516 Endurobol CAS 317318-70-0
- Other Name: Cardarine
- Appearance: White powder
- Purity: 99% Min
- Molecular Formula: C₂₁H₁₈F₃NO₃S₂
- Molecular Weight: 453.50
- CAS: 317318-70-0
- MOQ: 1kg
- Highlight: **HPLC Muscle Building Sarms,
Raw Muscle Building Sarms,
CAS 317318-70-0 Endurobol GW 501516**

Product Description

What is Muscle Building SARMS Raw Powder GW 501516 Endurobol?

Basic Information form:

Product Name	Muscle Building SARMS Raw Powder GW 501516 Endurobol CAS 317318-70-0
Cas No.	317318-70-0
Assay	99%
Appearance	White powder
MF	C ₂₁ H ₁₈ F ₃ NO ₃ S ₂
Shelf Life	2 years
MOQ	1kg

Brief Introduction:

Gw-501516 is a unique drug officially classified as a PPAR receptor agonist (PPAR-RA) common trade name: Cardarine. Research on the drug began in 1992 as a joint venture between Britain's GlaxoSmithKline and Ligand Pharmaceuticals. The product was being studied as a treatment for a variety of cardiovascular diseases as well as diabetes, obesity and other conditions, but the researchers soon discovered that PPAR-RA was very effective at improving endurance.

Cardarine(GW-501516) binds to PPAR receptors, in particular a group of nuclear receptors (sensors that detect thyroid and steroid hormones in vivo) that activate the PGC-1A enzyme. This behavior leads to gene expression, especially around energy expenditure.

Studies involving GW-501516 have shown an increase in fatty acid metabolism in mice. In studies using monkeys, GW-501516 usage data also showed an increase in HDL(good cholesterol) and a decrease in LDL(bad cholesterol), with or without exercise. GW-501516 will play its effect significantly.

Product Image:

**Application:**

1. Endurance: It is recommended stacking cardarine with AICAR and/or Equipoise. This is the ultimate endurance stack that will turn you into a race horse.
2. Fat loss: The best shredder stack would be stacking cardarine with S4 (Andarine). This is a well known potent 'cutting' stack.
3. Anabolic steroid stack: If you run moderate doses of anabolic steroids, or you run any harsh compound like trenbolone, then cardarine will aid in not only your lipids, but also with your ability to 'catch your wind.' Therefore, cardarine is a perfect stack for trenbolone, which makes many athletes lose their breath fast.
4. During PCT (post cycle therapy) or bridge: Since cardarine is not hormonal, it is in no way suppressive. Hence, you should not be scared of using it to keep fat off and improve your workouts between cycles during your bridge and PCT.
5. SARMS triple stack: If you want aato recomp, cardarine stacks beautifully with S4 and MK-2866.

Function:**1. GW-501516 & Liver Damage**

In contrast to popular belief, GW501516 doesn't promote damage of liver cells. The chemical has actually been known to promote healthy liver function and faster healing properties to the skin and muscle tissue. In essence, you will not heal rapidly like Wolverine from the X Men movies, but you will shorten the your recovery time from scratches, blisters, and injured muscles by a significant amount.

2. GW-501516 & Cancer

There has been many forum comments expressing the concerns of GW501516 and it's relationship to cancer and tumor development. Since 2004 many experiments have been done to prove this hypothesis.

3. Increases muscle endurance.

The effect of GW-501516 is very significant, and it is a popular product for preparing athletes. Those who use GW-501516 will find their endurance greatly improved, they will not tire out easily, and they will be able to train harder.

4. Reduced fat.

You can do aerobic exercise more vigorously and for longer. In addition, it does not have any catabolic effects associated with many lipid-reducing drugs, which means THAT GW501516 does not cause muscle loss during fat loss and can improve the efficiency of nutrient use, which greatly increases the body's absorption and utilization of the food consumed.

Package and Shipping of Muscle Building SARMS Raw Powder GW 501516 Endurobol

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

shipping:

With 3-5days after your payment

FAQ of Muscle Building SARMS Raw Powder GW 501516 Endurobol

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
