

99% Purity White Powder CJC-1295 Without DAC 2mg/vial for Muscle Growth

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-CJC-1295 Without DAC
- Minimum Order Quantity: 1 box
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: High Purity White Powder CJC-1295 Without DAC For Muscle Growth 2mg/vial
- Appearance: White powder
- Purity: 99%Min
- CAS No: 863288-34-0
- MF: C152h252n44o42
- MW: 3367.89688
- Storage: 2~8 Centigrade
- Melting Point: 193-204°C (DEC)

Product Description

What is High Purity White Powder CJC-1295 Without DAC For Muscle Growth 2mg/vial?

Basic Information Form:

Product Name	High Purity White Powder CJC-1295 Without DAC For Muscle Growth 2mg/vial
Cas No.	863288-34-0
Assay	99%
Appearance	White powder
MF	C152h252n44o42
Shelf Life	2 years
Condition	2-8

Brief Introduction:

Other name: Mod GRF, GHRH,CJC-1295 without DAC,MOD GRF 1-29,Modified GRF 1-29

CJC1295 without DAC is a 30 amino acid peptide hormone. Essentially, what this means is this peptide will release a series of pulses over a long period of time which usually equates to fewer injections. Even though CJC 1295's main function upon creation was found to boost protein synthesis, increased growth of muscle tissue and many other benefits come with it as well. CJC 1295 also helps injury recovery times, reduce body fat, boost immune system and bone density and cellular repair (skin and organs).

To clear up many misconceptions, let's get the semantics out of the way from the beginning.

CJC1295 without DAC is not CJC-1295, but is misnamed Mod GRF. When a peptide doesn't include DAC it's really not CJC 1295 but commonly called so.

GHRH's are paired specifically with GHRP's in order to create a synergy between the peptides that will unlock the body's own stores. Even though many peptides work in some capacity by themselves. This is why CJC 1295 is highly desirable, and it's one of the most widely used in the bodybuilding community. Right now, it has been debated which CJC 1295 is best to use. While MOD GRF (CJC 1295 no DAC) is more frequent injections will need to be administered. The CJC 1295 with DAC will result in a series of smaller pulses; therefore, injections will be less frequent - often two to three times a week.

Function:

Ipamorelin, a peptide agonist of the growth hormone secretory receptor, can significantly increase human plasma growth hormone (GH) levels. It is useful in:

Increase fat burning rate.

Maintains lean muscle tissue.

Restores and strengthens joints

Connective tissue and bone mass

Anti-aging associated with GH therapy, such as improved skin and hair quality.

When the secretion of natural GH is inhibited by long-term use of exogenous GH, it can also be used to protect and improve the level of autocrine GH
