

99% purity Growth Hormone Peptide MGF for Bodybuilding 2mg/Vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-MMGF
- Minimum Order Quantity: 1 box
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, , T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: 98% Purity Fat Loss Peptide MGF 2mg/Vial
Growth Hormone For Bodybuilding
- Specification: 2mg/vial, 10vials/box
- CAS NO: 140703-51-1
- Appearance: White powder
- Purity: 99%
- Storage Condition: Cool Dry Place

Product Description

What is 99% purity Fat Loss Peptide MGF 2mg/Vial Growth Hormone For Bodybuilding?

Basic Information Form:

Product Name	99% purity Fat Loss Peptide MGF 2mg/Vial Growth Hormone For Bodybuilding
Cas No.	140703-51-1
Assay	99%
Appearance	White powder
Application	Bodybuilding
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction:

MGF (Mechano Growth Factor), also known as IGF-1Ec, is a splice variant of the IGF gene which increases stem cell count in the muscle and allows for muscle fibers to fuse and mature. This is a process required for the growth of adult muscle. MGF is produced naturally when muscle fibers are broken down through resistance (weight training). MGF stimulates muscle growth, creates new muscle fibers, promotes muscle recovery, promotes nitrogen retention and increases protein synthesis.

In studies where MGF was administered intramuscularly, there was a 20% increase in the weight of the injected muscle fibers within 2 weeks. In further studies, it took 4 months for IGF to cause a 25% increase in muscle mass. MGF was found to be more potent than IGF-1 in rapid muscle growth. Fat loss and strength increases are not typically seen with MGF's use (as they are with IGF-1 use).

MGF contributes to repeated production of satellite cells in the muscle fibers which instigate the hypertrophy process in adult muscles. This process takes place when the skeletal muscle increases in size as a result of the growth of the cells' sizes. Satellite cells also initiate muscle regeneration by developing a sparse population of cells that are ready to multiply whenever you have a muscular injury.

MGF is different from IGF-I in that it can increase myoblast proliferation, but it completely inhibits myotube formation. In addition, the selective blocking of IGF-I receptors provided evidence that MGF increased myoblast proliferation through different signaling pathways. MGF did not induce the stimulatory activity of IGF-IR. Consistent with our findings, it has been found that e-peptide does not directly induce IGF-I-1R phosphorylation. Although exposure to e-peptides has been shown to increase the proliferation and migration of myoblasts in rodent models, many of these effects remain evident even when IGF-IR is blocked by neutralizing antibodies, suggesting that the effects of these E-peptides are independent of IGF-IR effects.

Function:

The MGF retains nitrogen which sustains the measurement of the number of proteins available in one's body. Protein is an essential nutrient for body tissues which is basically the raw materials used for building muscles. Order Pegylated Mechano Growth Factor online.

MGF increases muscle protein synthesis that fosters muscle growth. When one gets some exercise done, the muscles experience small tears that lead to increased blood flow around that area. This instigates a reaction on this protein to fix the injured muscle. It is this process that enables muscles to become larger and stronger.

- Increases muscle mass
- Speeds up recovery
- Aids permanent fat loss
- Repairs and recovers wasted muscle tissue
- Enables wasted tissue to grow
- Boosts the regulation of protein synthesis
- Leads to an overall boost in strength and muscle mass

Package and Shipping of 99% purity Fat Loss Peptide MGF 2mg/Vial Growth Hormone For Bodybuilding

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of 99% purity Fat Loss Peptide MGF 2mg/Vial Growth Hormone For Bodybuilding

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
