

Muscle Growth IGF 1 LR3 Peptide 0.1mg/vial CAS 946870-92-4

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-IGF-1 LR3
- Minimum Order Quantity: 1box
- Price: Negotiable
- Packaging Details: 0.1mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: Anti-Aging Peptide IGF-1 LR3 For Bodybuilding Muscle Growth CAS 946870-92-4
- CAS: 946870-92-4
- Specification: 0.1mg/vial, 10vials/box
- Appearance: White powder
- Grade: Pharmaceutical Grade
- Purity: 99%
- Highlight: **0.1mg/vial IGF 1 LR3 Peptide, Muscle Growth IGF 1 LR3 Peptide, CAS 946870-92-4 Anti Aging Peptide**

Product Description

What is Anti-Aging Peptide IGF-1 LR3 For Bodybuilding Muscle Growth?

Basic Information Form:

Product Name	Anti-Aging Peptide IGF-1 LR3 For Bodybuilding Muscle Growth
Cas No.	946870-92-4
Assay	99%
Appearance	White powder
Application	Bodybuilding
Shelf Life	2 years
Condition	Cool Dry Place

Brief Introduction:

Long(R3)-IGF-I is a synthetic variant of Insulin-Like Growth Factor-1 (IGF-I), a peptide hormone found naturally in the human body. It is a close derivative of this natural protein. The name "Long R3" actually describes how the original IGF-I protein has been modified. It is made by extending the IGF-I protein with a chain of 13 amino acids, and substituting an arginine at the 3rd position.

This new synthetic form of IGF-I seems to retain much of the hormone's original biological activity. It binds and activates the IGF-I receptor with similar affinity, and imparts a similar anabolic effect. However, it also differs by displaying a significantly longer half-life, and higher resistance to binding proteins, in comparison. As a result, milligram for milligram, Long(R3)-IGF-I is estimated to be approximately 2.5 to 3 times more potent than natural IGF-I. In the fitness community, this substance is most commonly used to support increases in muscle mass.

Product Image:

HGH 176-191

Application:

- 1) IGF-1 LR3 is very effective at building muscle and burning fat. It acts as a neuroprotector and a neuromotor so mental functions like memory, reflexes and learning ability is enhanced.
- 2) IGF-1 LR3 is essential for the production of connective tissues and insures proper bone density.
- 3) By promoting nitrogen retention and protein synthesis, IGF-1 LR3 facilitates growth of muscles by hyperplasia and mitogenesis. In other words, it is not only responsible for making muscle fibers bigger, it also makes more of them.
- 4) IGF-1 LR3 is an amino acid of the original IGF-1 in the human body but with the substitution of Arg for the Glu at position 3. It also has a 13 amino acid extension peptide that makes it more potent than IGF-1.

IGF-1 Function:

- Enlarged amino acid transporting cells
- Increased protein production
- Reduced protein degradation
- Amplified glucose transporting
- Augmented RNA combination

Package and Shipping of Anti-Aging Peptide IGF-1 LR3 For Bodybuilding Muscle Growth

Package: 0.1mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Anti-Aging Peptide IGF-1 LR3 For Bodybuilding Muscle Growth

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
