

Hormone Releasing Factor Lyophilized Powder Sermorelin Peptide

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Sermorelin
- Minimum Order Quantity: 1BOX
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 3000kg/Month

Product Specification

- Product: Hormone Releasing Factor Powder GRF (1-29) S' Ermorelin Lyophilized Powder Peptide
- Appearance: White powder
- MW: 3357.88
- MF: C149h246n44o42s
- CAS: 86168-78-7
- Specification: 2mg/vial, 10vials/box
- Storage: 2~8 Centigrade
- Shelf Life: 2 Years

Product Description

What is Hormone Releasing Factor Powder GRF (1-29) S' Ermorelin Lyophilized Powder Peptide?

Basic Information Form:

Product Name	Hormone Releasing Factor Powder GRF (1-29) S' Ermorelin Lyophilized Powder Peptide
Cas No.	86168-78-7
Sequence	H-Tyr-Ala-Asp-Ala-Ile-Phe-Thr-Asn-Ser-Tyr-Arg-Lys-Val-Leu-Gly-Gln-Leu-Ser-Ala-Arg-Lys-Leu-Leu-Gln-Asp-Ile-Met-Ser-Arg-NH ₂
Molecular Formula	C ₁₄₉ H ₂₄₆ N ₄₄ O ₄₂ S
Molar Mass	3357.88 g/mol
Purity	≥99%
Impurity	≤0.5%
Storage Temperature	2-8°C

Brief Introduction:

S'ermorelin / S'ermorelin Acetate is a truncated analog of GRF 1-44 that is naturally produced by the brain to stimulate pituitary production. The increased volume produced by the pituitary gland causes an increase in the production of Insu-Like Growth Factor-1 by the liver and results in the benefits of treatment provided to the adult patient.

S'ermorelin / S'ermorelin acetate is the acetate salt of an amidated synthetic 29-amino acid peptide that corresponds to the amino-terminal segment of the naturally occurring consisting of 44 amino acid residues. It stimulates the pituitary gland to naturally produce increased amounts.

S'ermorelin / S'ermorelin acetate shares similar structure, is a bio-identical synthetic hormone that is extremely effective in increasing the amount of G H. S'ermorelin acetate is a recently synthesized (man-made) peptide analogue of a naturally occurring hormone that is produced in the hypothalamus and stimulates and controls the production within the pituitary gland.

Product Usage:

S'ermorelin / S'ermorelin acetate has a wide range of positive effects. Due to its nature as a GHRH, s'ermorelin only increases the body's ability to produce more hormone, it is not an injection of hormone itself. In both a performance enhancing and general well-being sense, s'ermorelin has a wide array of benefits that make it a powerful and valuable substance.

Package and Shipping of Hormone Releasing Factor Powder GRF (1-29) S' Ermorelin Lyophilized Powder Peptide

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Hormone Releasing Factor Powder GRF (1-29) S' Ermorelin Lyophilized Powder Peptide

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines,TNT, FEDEX, EMS, ect.
