

HPLC 99% Purity Human Growth Hormone Peptide HGH 191aa 10iu/vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH 191aa
- Minimum Order Quantity: 1 BOX
- Price: Negotiable
- Packaging Details: 10iu/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, , T/T
- Supply Ability: 5000kg/Month

Product Specification

- Name: HPLC 99% Purity Human Growth Hormone Peptide HGH 191aa 10iu/vial
- CAS: 12629-01-5
- Outlook: White powder
- Assay: 99%
- MF: C11H13BrN2O5
- MW: 333.135
- MOQ: 1 BOX
- Shelf Life: 24 Months
- Highlight: HPLC HGH 191aa Peptide,
HPLC metabolism Regulating HGH 191aa
Peptide
, HPLC human growth hormone 191aa

Product Description

What is HPLC 99% Purity Human Growth Hormone Peptide HGH 191aa 10iu/vial?

Basic Information Form:

Product Name	HPLC 99% Purity Human Growth Hormone Peptide HGH 191aa 10iu/vial
CAS NO.	12629-01-5
MF	C11H13BrN2O5
EINECS NO.	unavailable
Purity	99%
Appearance	White
Place of origin	China
MOQ	1box
Storage	2-8°C

Brief Introduction:

Human Growth Hormone (HGH) is a single-chain, unsaccharified hydrophilic globulin composed of 191 amino acids with molecular weight of 21700Da and isoelectric point pI of 4.9. The 53 and 165 Chemicalbook and 182 and 189 cysteine residues are connected by disulfide bonds; About 75% of the growth hormone secreted by the anterior pituitary eosinophils is secreted in this molecular form, and 5% ~ 10% is secreted in the molecular weight of 20kDa.

Spontaneous secretion of HGH takes the form of paroxysm between day and night, and generally occurs during the first slow wave sleep (SWS) after physiological sleep. At rest during the day, it seems that HGH release can be promoted. Feeding, fasting, exercise and stress can affect the secretion of HGH, but do not change its basal rhythm. In adolescence, HGH is secreted in high amplitude, fast frequency and large amount of day and night.

Function:

1. Promote growth and regulate bone metabolism

Stimulate the differentiation and proliferation of epiphyseal chondrocytes, thereby promoting bone growth and increasing bone length.

It can directly stimulate osteoblast metabolism and play an important role in maintaining bone mineral content and bone mineral density.

Interacted with sex hormone and calcification hormone in bone remodeling.

2. Regulate substance metabolism

Promote protein synthesis and correct negative nitrogen balance.

Regulate lipid metabolism, reduce body fat reserves, increase serum fatty acid content, reduce serum cholesterol and low density lipoprotein levels.

It can reduce the sensitivity of cells to insulin, reduce the use of glucose by peripheral tissues, and increase blood glucose.

It plays an important role in water and mineral metabolism. Can make cell potassium salt, phosphate retention, but also promote the renal tubule sodium absorption, cause water, sodium retention.

Package and Shipping of HPLC 99% Purity Human Growth Hormone Peptide HGH 191aa 10iu/vial

Package: 10iu/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of HPLC 99% Purity Human Growth Hormone Peptide HGH 191aa 10iu/vial

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
