

2mg/Vial Health Peptide Frag 176 Peptide Powder HGH Fragment

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Fragment
- Minimum Order Quantity: 1box
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days
- Payment Terms: T/T, , Western Union

Product Specification

- Name: 2mg/Vial Health Peptide Frag 176 Peptide Powder HGH Fragment
- CAS: 12629-01-5
- Assay: 99%
- MF: C990H1529N263O299S7
- Outlook: White Powder
- Specification: 2mg/vial, 10vials/box
- Storage: 2~8
- MOQ: 1box
- Highlight: 2mg/Vial HGH Fragment Peptide,
Muscle Building HGH Fragment Peptide,
Powder Health Peptide Frag 176

Product Description

What is 2mg/Vial Health Peptide Frag 176 Peptide Powder HGH Fragment?

Basic Information Form:

Product Name	2mg/Vial Health Peptide Frag 176 Peptide Powder HGH Fragment
CAS NO.	863094-23-9
MF	C ₁₅ H ₁₉ NO ₄ S ₂
EINECS NO.	unavailable
Purity	99%
Appearance	White
Place of origin	China
MOQ	1box
Storage	2-8°C

Brief Introduction:

Frag 176-191 is a peptide fragment of the C-terminus of human Growth Hormone. Investigators at Monash University discovered that the fat-reducing effects of GH appear to be controlled by a small region near one end of the Growth Hormone molecule. This region, which consists of amino acids hgh frag 176-191, is less than 10% of the total size of the GH molecule and appears to have no effect on growth or insulin resistance. Like Growth Hormone, the frag 176-191 stimulates lipolysis (the breakdown or destruction of fat) and inhibits lipogenesis (the transformation of nonfat food materials into body fat) both in laboratory testing and in animals.

Product Image:

Function :

In laboratory tests on fat cells from rodents, pigs, dogs, and humans, the fragment released fat specifically from obese fat cells but not from lean ones, reduced new fat accumulation in all fat cells, enhanced the burning of fat. In rodents (rats and mice), fragment reduced body fat in obese animals but, enhanced fat burning without changing food consumption or inducing growth (as it does not increase IGF levels) or any other unwanted Growth Hormone effect. Research dosages of 500mcg of the fragment 176-191 daily for 30 days did show a reduction of body fat in the mid abdominal area in both obese, over-weight, and average built people.

Dosage:

HGH Frag is like all of the other peptides we have covered and come as a delicate lyophilized powder that should be kept out of the light and in a cool dry place. Reconstitution is done with bacteriostatic water or sodium chloride meant for injection. In order to reap the benefits of HGH Frag, users will need to dose around 500mcgs per day. This can be done by dosing 250mcgs in the morning pre-workout, and 250mcgs before lunch or 250mcgs before bed. Users will also want to take note of the timing of injections and their diet at that time. It is optimal to inject HGH Frag 176-191 on an empty stomach or with just protein in the stomach. Like other peptides, HGH Frag has been noted to not work as effectively in the presence of carbohydrates and sugars.

Package and Shipping of 2mg/Vial Health Peptide Frag 176 Peptide Powder HGH Fragment

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of 2mg/Vial Health Peptide Frag 176 Peptide Powder HGH Fragment

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
