

99%HPLC White Powder HGH Fragment Peptide for Sleep Improvement 5mg

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HGH Fragment Peptide
- Minimum Order Quantity: 1 box
- Price: Negotiable
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, , T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: 99%HPLC White Powder HGH Fragment Peptide For Sleep Improvement 5mg
- CAS: 12629-01-5
- Color: White
- Material: Powder
- Purity: 99%
- Package: 5mg/vial, 10vials/box
- Storage: 2~8 Centigrade
- MOQ: 1 box
- Highlight: **white powder HGH Fragment Peptide ,
Sleep Improvement HGH Fragment Peptide,
HPLC hgh frag 5mg**

Product Description

What is 99%HPLC White Powder HGH Fragment Peptide for Sleep Improvement 5mg?

Basic Information Form:

Product Name	99%HPLC White Powder HGH Fragment Peptide for Sleep Improvement 5mg
CAS NO.	863094-23-9
MF	C15H19NO4S2
EINECS NO.	unavailable
Purity	99%
Appearance	White
Place of origin	China
MOQ	1box
Storage	2-8°C

Brief Introduction:

As the name suggests, HGH Fragment 176-191 is a Fragment of growth hormone. What is a Fragment? Many people may not understand that peptide hormones have a chain of amino acids, while growth hormone HGH has a total of 191. For example, the 191 segments of growth hormone are arranged in order: 1,2,3,4,5,6,7,8.....All the way to 191, so HGH Fragment 176-191 is taking the end amino acid chain of the Fragment 176-191, so why take the end instead of the other place? It is well known that growth hormone HGH has the effect of reducing fat. In the study, it was found that the fat reducing effect of growth hormone HGH is controlled by the C-terminal region of growth hormone molecule. The interception of the c-terminal region of 176-191 means that the fat reducing effect of growth hormone is isolated. At the same time, the fat-reducing capacity of HGH fragment region 176-191 was 12.5 times that of HGH fragment as a whole.

Product Image:

**Advantages:**

HGH Fragment 176-191, as part of HGH growth hormone peptide group, has an incredible ability to regulate fat metabolism without adverse side effects on insulin sensitivity like HGH as a whole.

1. By separating the ends of the GH molecule, scientists found that HGH fragment 176-191 was more powerful than HGH in stimulating adipolysis (adipolysis). In fact, the growth hormone fragment 176-191 actually inhibits fat production, which prevents the formation of fatty acids and other lipids.
2. It is different from other fat-reducing drugs commonly used by bodybuilders, so that the user will not experience a large increase in hunger and stress associated with clenbuterol, ephedrine and other side effects.
3. Since HGH fragment 176-191 is only the terminal part of HGH growth hormone, it will not participate in the competition to bind HGH receptor. Many studies have shown that HGH fragment 176-191 does not cause hyperglycemia.

Function :

1. Promote lean weight gain
2. Promote protein synthesis
3. Increases bone mineral density.
4. Improve sleep quality

Package and Shipping of 99% HPLC White Powder HGH Fragment Peptide for Sleep Improvement 5mg

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of 99%HPLC White Powder HGH Fragment Peptide for Sleep Improvement 5mg

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines,TNT, FEDEX, EMS, ect.
