

Medical Grade MK677 Powder for Muscle Growth CAS 159752-10-0

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-MK 677
- Minimum Order Quantity: 1kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Name: Medical Grade Increase Muscle MK 677
Ibutamoren Capsules CAS 159752-10-0
- Purity: 99%
- Color: White
- Material: Powder
- MF: $C_{27}H_{36}N_4O_5S \cdot CH_4O_3S$
- MW: 624.776
- CAS: 159752-10-0
- MOQ: 1kg
- Highlight: Medical Grade MK677 Powder,
Ibutamoren Capsules MK677 Powder,
CAS 159752-10-0 Mk 677 Muscle Growth

Product Description

What is Medical Grade Increase Muscle MK 677 Ibutamoren Capsule?

Basic Information form:

Product Name	Medical Grade Increase Muscle MK 677 Ibutamoren Capsules CAS 159752-10-0
Cas No.	59752-10-0
Assay	99%
Appearance	White powder
MF	C ₂₇ H ₃₆ N ₄ O ₅ S.CH ₄ O ₃ S
Molecular Weight	624.776
Attention Terms	Store at -20°C

Brief Introduction:

Ibutamoren, also known as MK 677, is a drug which acts as a potent, orally active growth hormone secretagogue, mimicking the GH stimulating action of the endogenous hormone ghrelin.

Ibutamoren is a strong and long-acting selective ghrelin receptor agonist . Ghrelin receptors – GHSRs (Growth hormone secretagogue receptors) naturally trigger the production of endogenous growth hormone . Ibutamoren stimulates the production of growth hormone essentially by mimicking the function and activity of another endogenous hormone – ghrelin: The action and binding of Ibutamoren MK-677 to Ghrelin receptors first results in the release GHRH (Growth-hormone-releasing hormone) from neurons in the Nucleus arcuatus (infundibular nucleus of the Hypothalamus), which is then transmitted by the hypothalamic-pituitary portal system to the anterior Pituitary, where by acting on GHRHR (Growth hormone-releasing hormone receptor (GHRH receptors)) stimulates the resulting growth hormone secretion pituitary gland.

Product Image:

Function:

1. Ibutamoren MK-677 strongly supports the growth of muscle mass and anabolic state of the body (helps maintain a positive nitrogen balance)
2. Ibutamoren MK-677 has a strong anti-catabolic effect, effectively protects muscle mass from degradation
3. Ibutamoren MK-677 improves performance and condition
4. Ibutamoren MK-677 speeds up fat metabolism – helps burn excess body fat and prevent its re-storage
5. Ibutamoren MK-677 brings very good and faster regeneration of muscles and the whole body, helps to heal old wounds and injuries
6. Ibutamoren MK-677 significantly improves sleep quality at night, brings a very strong feeling of freshness, energy and vitality in the morning and during the day
7. Ibutamoren MK-677 leads to a significant improvement in the condition and quality of the skin, helps to smooth out wrinkles
8. Ibutamoren MK-677 has a strong anti-aging effect, rejuvenates the body, acts against aging

Package and Shipping of Medical Grade Increase Muscle MK 677 Ibutamoren Capsules CAS 159752-10-0

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg:inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5days after your payment

FAQ of Medical Grade Increase Muscle MK 677 Ibutamoren Capsules CAS 159752-10-0

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
