

Male Fat Loss Sarms Raw Powder LGD4033 10mg CAS 1165910-22-4

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-LGD 4033
- Minimum Order Quantity: 1kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T, MoneyGram
- Supply Ability: 4000kg/Month

Product Specification

- Name: Male Fat Loss Sarms Raw Powder LGD4033 10mg CAS 1165910-22-4
- Purity: 99%
- Color: White
- Material: Powder
- MF: $C_{14}H_{12}F_6N_2O$
- MW: 338.25
- CAS: 1165910-22-4
- MOQ: 1kg
- Highlight: 10mg male LGD4033, Fat Loss LGD4033, CAS 1165910-22-4 Sarms Powder

Product Description

What is Male Fat Loss Sarms Raw Powder LGD4033 10mg CAS 1165910-22-4?

Basic Information form:

Product Name	Male Fat Loss Sarms Raw Powder LGD4033 10mg CAS 1165910-22-4
Cas No.	1165910-22-4
Assay	99%
Appearance	White powder
MF	C ₁₄ H ₁₂ F ₆ N ₂ O
Molecular Weight	338.25

Brief Introduction:

LGD-4033 is a selective receptor modulator (SARMS), and a novel non-steroidal oral SARM that binds to AR with high affinity (K_i of ~1 nM) and selectivity. It's in a class of receptor (AR) ligands that is tissue selective, developed to treat muscle wasting associated with cancer, acute and chronic illness and age-related muscle loss. LGD-4033 is expected to produce the therapeutic benefits of with improved safety, tolerability and patient acceptance due to tissue-selective mechanism of action and an oral route of administration.

LGD-4033, a novel nonsteroidal, oral selective receptor modulator, binds to the receptor with high affinity and selectivity. It demonstrates anabolic activity in muscles, anti-resorptive and anabolic activity in bones and a robust selectivity for muscle and bone versus prostate and sebaceous glands. LGD-4033 has recently completed a Phase I Multiple Ascending Dose study in healthy volunteers.

It's considered a good addition for those who want to retrain: to reduce body fat and increase muscle mass.

Dosage :

Benefits have been recorded for doses as low as 3-10mg every 24 to 36 hours. Subjects were known to tolerate treatments with significant benefits after 2 weeks, and continued to improve for up to 5 months (20 weeks). Note that the study concluded that tolerance increased after 3 months and the benefit continued to decrease.

Many male users report that the ideal upper limit for LGD-4033 is 10mg daily morning for 12 weeks.

Although some women have reported using LGD-4033, it has been suggested that it may lead to masculinization and a lower dose is recommended. Women are advised to stick to the maximum of 5mg a day.

Product Image:

Function:

1. LGD-4033 (Ligandrol) – strong anabolic activity resulting in a massive increase in muscle mass and strength, without the current strong and harmful side effects
2. LGD-4033 has strong anti-catabolic effects and protects muscle mass from degradation
3. LGD-4033 is indeed a real and comparable alternative
4. LGD-4033 has strong support for burning body fat
5. LGD-4033 has a rapid onset of action
6. LGD-4033 brings very good regeneration
7. LGD-4033 has a relatively long potency and half-life per tablet supplement (24-36 hours).
8. LGD-4033 improves blood circulation and muscle pumping during training
9. LGD-4033 brings an overall improvement in health, well-being and vitality

Package and Shipping of Male Fat Loss Sarms Raw Powder LGD4033 10mg CAS 1165910-22-4

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg:inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5days after your payment

FAQ of Male Fat Loss Sarms Raw Powder LGD4033 10mg CAS 1165910-22-4

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.
