Product Description

What is White Raw Powder MK 2866/Ostarine for Muscle Building CAS 841205-47-8?

MK-2866 is a great SARM because it binds directly to the androgen receptor, which will increase protein synthesis, much like anabolic steroids. Ostarin has no adverse side effects, such as estrogen conversion or DHT conversion, which are known to be caused by steroids. MK-2866 is used to prevent and treat muscle waste, and being able to prevent muscle waste means it also has great potential to increase lean weight.

Ostarin has very limited side effects and can be used to inflate, cut or supplement, making it very friendly to athletes, bodybuilders and fitness enthusiasts compared to other drugs.

Function of White Raw Powder MK 2866/Ostarine for Muscle Building CAS 841205-47-8

1. Gain lean muscle. The gains in total weight will not be comparable to bulking steroids, however the total gains will almost entirely be lean muscle.
2. Lose weight. As Ostarine has anabolic effects, the dieter can cut calories without having to worry about muscle or strength loss. Ostarine would primarily fit into a cutting protocol for the maintenance of muscle mass while reducing calories. One of the most disheartening outcomes of cutting is the loss hard earned muscle mass. The drop in metabolic rate and hormone levels (T3, IGF, Testosterone etc) with the lack of calories is a perfect catabolic environment for loss of muscle tissue.
3. Healing and repair of damaged joints.
