

HPLC 99% MK 2866 Powder CAS 841205-47-8 for Muscle Growth

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-MK 2866
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25kg Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 3000kg/Month

Product Specification

- Product Name: HPLC 99% MK 2866 Powder CAS 841205-47-8 For Muscle Growth
- Other Name: Ostarrin
- Purity: >99%
- CAS: 841205-47-8
- MW: 389.33
- MF: C₁₉H₁₄F₃N₃O₃
- Storage: 2~8 Centigrade
- Shelf Life: 2 Years
- Highlight: HPLC MK 2866 Powder, 99% MK 2866 Powder, CAS 841205-47-8 Muscle Growth Powder

Product Description

What is HPLC 99% MK2866 / Ostarine Sarms Powder For Muscle Growth?

MK2866, also known as Ostarine is a SARM created by GTX to avoid and treat muscle wasting. It can later on be a cure for avoiding atrophy (total wasting away of a body part), cachexia, sarcopenia and Hormone Replacement Therapy. This type of SARM cannot only retain lean body mass but as well as increase it.

In comparison to testosterone and other anabolic steroids, the advantage of SARMS, is they do not have androgenic activity in non-skeletal muscle tissues. Ostarine is effective in maintaining and increasing lean body mass.

Enobosarm (Ostarine, MK-2866, GTX-024) - affects both muscle and bone, intended mainly for osteoporosis but also general treatment for andropause and reversing muscle sarcopenia in the elderly and for cachexia in cancer patients. Nonsteroidal selective androgen receptor modulator (SARM) used in the treatment of osteoporosis and muscle wasting in animal models. A potential compound for the treatment of hypoactive sexual desire disorder.

Product Name	HPLC 99% MK2866 / Ostarine Sarms Powder For Muscle Growth CAS 841205-47-8
Appearance	white, powder
Purity	99.5% HPLC
CAS No.	841205-47-8
Molecular Formula	C ₁₉ H ₁₄ F ₃ N ₃ O ₃
Molecular Weight	389.33
Package	Aluminum Bag or Fibre Drum

Function

Losing Bodyfat (cutting):

Ostarine would primarily fit into a cutting protocol for the maintenance of muscle mass while reducing calories. One of the most disheartening outcomes of cutting is the loss hard earned muscle mass. The drop in metabolic rate and hormone levels (T3, IGF, Testosterone etc) with the lack of calories is a perfect catabolic environment for loss of muscle tissue. As Ostarine has anabolic effects, the dieter can cut calories without having to worry about muscle or strength loss. Ostarine has also shown noticeable nutrient partitioning effects among users, another reason why it can be of great help when cutting. A 15-20 mg dosing protocol for 6-8 weeks is good for cutting with Ostarine without undergoing any side effects or high suppression. However it must be stated that due to the lack of androgenicity, muscle hardness and overall results are not as prominent as with the SARM S-4.

Package and Shipping of HPLC 99% MK2866 / Ostarine Sarms Powder For Muscle Growth

1.Package:

Under 25kg: Inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: 25kg/drum inner with double PE bags

2. Shipping

3~5 days after your payment.

FAQ of HPLC 99% MK2866/Ostarine Sarms Powder For Muscle Growth

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
