Brief Introduction:

CJC-1295 DAC has shown some amazing results as a growth hormone releasing hormone (GHRH) analog. Not only has CJC-1295 shown the ability to increase growth hormone and IGF-I secretion and its benefits, but it has been able to do so in very large amounts. Recent research studies have shown that CJC - 1295 stimulates GH and IGF-1 Secretion, and will keep a steady increase of HGH and IGF-1 with no increase in prolactin, leading to intense fat loss, and increases protein synthesis.

CJC-1295 DAC is a long-acting GHRH analog and stimulates GH and IGF-1 secretion. It will keep a steady increase of HGH and IGF-1 with no increase in prolactin. CJC-1295 DAC represents a very exciting new compound that has the potential to increase growth hormone and IGF-I secretion and effects, with a built-in safeguard (the feedback effects of IGF-I) to limit excessive elevations of GH and IGF-1 levels. Intense fat loss. Increases protein synthesis for more muscle growth.
