#### Brief Introduction:

CJC-1295 is a GHRH (long 44-amino acid version) that removes 15 amino acids, so a total of 29 amino acids, and binds to A DAC which is also known as the drug-affinity complex, and CJC-1295 is commonly known as the GHRH drug-affinity complex, which basically extends its life span.

The difference between the CJC-1295 and CJC-1295 DACs is the CJC-1295 DAC version CJC-1295 plus the so-called CJC-1295. Drug-affinity complex (DAC) can significantly prolong its action and action. This means that the product will remain in vivo for much longer than the usual duration for CJC-1295 (without DAC), i.e. up to 14 days.

#### Pictures:

#### Function:

1. It can increased growth hormone secretion and IGF-1 Levels with no increase in prolactin
2. It can increased Body Weight and Length through increased protein synthesis
3. It can increased Muscle Growth
4. It can increased Bone Density
5. It can improved Immune Function
