

Fat Lossing 99% Sarms Powder GW 501516 Cardarine 50mg/vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-GW 501516
- Minimum Order Quantity: 1kg
- Price: Negotiable
- Packaging Details: 50mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 3000kg/Month

Product Specification

- NAME: Fat Lossing 99% Sarms Powder GW 501516 Cardarine 50mg/vial
- APPEARANCE: WHITE, POWDER
- PURITY: 99%
- CAS NO: 317318-70-0
- MW: 453.50
- MF: $C_9H_{14}N_4O_5$
- STORAGE: -20- 4°C
- SHELF LIFE: 2 YEARS
- Highlight: 50mg/vial Fat Loss Sarms Powder ,
50mg/vial 99% Sarms Powder ,
50mg/vial GW 501516 Cardarine

Product Description

What is Fat Lossing 99% Sarms Powder GW 501516 Cardarine 50mg/vial?

GW'501516 (GSK-516) is a drug that acts as a PPAR δ modulator. GW 501516 activates and stimulates glucose uptake in skeletal muscle tissue, and GW 501516 has been demonstrated to reverse metabolic abnormalities in obese men with pre-diabetic metabolic syndrome, most likely by stimulating fatty acid oxidation. It has been proposed as a potential treatment for obesity and related conditions, especially when used in conjunction with a synergistic compound AICAR, as the combination has been shown to significantly increase exercise endurance in animal studies.

Product Name	Fat Lossing 99% Sarms Powder GW 501516 Cardarine 50mg/vial
Appearance	White, powder
Specification	50mg/vial
Assay	99%min
Test	HPLC
CAS	317318-70-0
MF	C ₂₁ H ₁₈ F ₃ NO ₃ S ₂

**Application:**

1. Endurance: It is recommended stacking cardarine with AICAR and/or Equipose. This is the ultimate endurance stack that will turn you into a race horse.
2. Fat loss: The best shredder stack would be stacking cardarine with S4 (Andarine). This is a well known potent 'cutting' stack.
3. Anabolic steroid stack: If you run moderate doses of anabolic steroids, or you run any harsh compound like trenbolone, then cardarine will aid in not only your lipids, but also with your ability to 'catch your wind.' Therefore, cardarine is a perfect stack for trenbolone, which makes many athletes lose their breath fast.

Function:**1. GW-501516 & Liver Damage**

In contrast to popular belief, GW501516 doesn't promote damage of liver cells. The chemical has actually been known to promote healthy liver function and faster healing properties to the skin and muscle tissue. In essence, you will not heal rapidly like Wolverine from the X Men movies, but you will shorten the your recovery time from scratches, blisters, and injured muscles by a significant amount.

2. GW-501516 & Cancer

There has been many forum comments expressing the concerns of GW501516 and it's relationship to cancer and tumor development. Since 2004 many experiments have been done to prove this hypothesis, but so far, all of them have been largely unsuccessful.

Dosage:

The half life of cardarine is 20-24 hours. This means that once a day dose is totally fine. Some athletes like to use all the 20 mg an hour before their workout session, and others will split the dose in half in the AM and PM.
