

Fat Burning Human Growth Peptides GMP CAS 170851-70-4 Ipamorelin

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Ipamorelin
- Minimum Order Quantity: 1BOX
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: GMP Standard 99% Medicine Peptide
Ipamorelin Raw Powder CAS: 170851-70-4
- Outlook: White, Powder
- Purity: 99%
- CAS: 170851-70-4
- MF: C38H49N9O5
- MW: 711.86
- Storage: 2~8 Centigrade
- Shelf Life: 2 YEARS
- Highlight: **GMP Human Growth Peptides,
Fat Burning Human Growth Peptides,
CAS 170851-70-4 Ipamorelin Peptide**

Product Description

What is GMP Standard Peptide Ipamorelin Raw Powder For Fat Burning CAS: 170851-70-4

Basic Information form:

Product Name	GMP Standard Peptide Ipamorelin Raw Powder For Fat Burning CAS: 170851-70-4
Cas No.	170851-70-4
Assay	99%
Appearance	White powder
MF	C38H49N9O5
Molecular Weight	711.86
Attention Terms	Store at 2~8 centigrade

Brief Introduction:

Ipamorelin, a peptide agonist of the growth hormone secretory receptor, can significantly increase human plasma growth hormone (GH) levels.

Ipamorelin belongs to regulatory peptides because it is GH releasing protein; Its chain is quite short and only consists of five amino acids. Its molecular mass/weight is 711.86 and its molecular formula is C38H49N9O5. Ipamorelin was synthesized as innovative and novelty mimetic of ghrelin therefore it possesses ability to enhance gastric motility.

After an athlete administers Ipamorelin, a selective pulse is sent that stimulates the hypothalamus/pituitary to release GH. This pulse can endure for approximately three hours after injection. Once the GH pulse is sent, the cells go directly to the muscle to support development while staying clear of any possible bone or cartilage growth. This is good for Ipamorelin users, as long term usage will effect lean body muscle growth without the possibility of experiencing any bone or cartilage deformities. The same cannot be said for synthetic HGH users, who experience pronounced side effect in swelling joints and even in some cases Carpel Tunnel. Ipamorelin will increase cell synthesis, elevate secretion levels of insulin from pancreatic tissue, and increase ghrelin in the stomach - which helps release GH and control hunger. All of these functions work to promote fat loss, shuttling of nutrients, and building clean muscle.

Dosage and

Usage:

Ipamorelin, like other peptides, comes as a freeze dried powder that is very delicate. You can store it in the refrigerator or at room temperature before reconstituting. Once reconstituted with bacteriostatic water, the vials must be stored in a cool dry place like your refrigerator. Insulin syringes are the best way to administer it, usually via subcutaneous injection.

Of course, using iPamorelin with a GHRH like CJC w/out DAC will give the user the biggest increase in GH and IGF-1 as GHRP's and GHRH's work together synergetically. The average dosing for Ipamorelin is 200-300mcg two to three times daily. Twelve week cycles are quite normal and PCT would be very minimal - mini-pct is fine. If prolactin issues ever arise, there are products that help reduce prolactin and estrogen-like symptoms.

The recommended effective dose is 1mcg/kg of bodyweight (100mcg for a man weighing 100kg). It elevates GH levels for about 3.5 hours after subcutaneous injection, and best results are obtained when using 3 or 4 doses per day. For those who wish to use it only once a day for anti-aging purposes, the best time to use it is right before bed, preferably with a GHRH. Ipamorelin has a synergistic effect when administered during a natural GH pulse and optimal times for use are at night right before bed, pre workout or immediately post workout, and first thing in the morning.

Package and Shipping of GMP Standard 99% Medicine Peptide Ipamorelin Raw Powder CAS: 170851-70-4

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of GMP Standard 99% Medicine Peptide Ipamorelin Raw Powder CAS: 170851-70-4

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
