

White Powder Testosterone Cypionate for Preventing Osteoporosis

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1 kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25kg Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: White Powder Testosterone Cypionate For Preventing Osteoporosis
- CAS: 57-85-2
- Color: White
- Material: Powder
- MF: C45h55n9o6
- MW: 344.49
- Storage: -20-4
- MOQ: 1kg
- Highlight:
 - Preventing Osteoporosis White Testosterone Cypionate Powder
 - , Preventing Osteoporosis 1kg Testosterone Cypionate Powder
 - , Preventing Osteoporosis Testosterone Propionate Powder

Product Description

What is White Powder Testosterone Cypionate for Preventing Osteoporosis?

Basic Information Form:

Name	White Powder Testosterone Cypionate for Preventing Osteoporosis
Cas	57-85-2
Assay	99%
Outlook	White powder
MF	C45h55n9o6
Shelf Life	2 years
Attention Terms	-20-4

Brief Introduction:

Propionic acid composition is a commonly used composition for injection. The added propionic acid composition will slowly synthesize the speed at which the acid is released from the injection, in a few days. Therefore, the synthesis of propionic acid only has a duration, but other synthetic compounds such as heptane and cyclopentadiene. Most people think that the development of propionic acid gel is a faster synthesis method, and propylene injection is used for the old synthesis, which is developed by the quick effect. The slower and more comfortable features are closer to shrinking. As an injection animation, he takes effect quickly, and can more intuitively capture size and strength.

Testosterone propionate was first born in 1935. In a series of experiments, propionate was used to increase the therapeutic use of testosterone by slowing the release of testosterone into the serum. Two years later, Schering, Germany, will launch the first testosterone propionate product called Testoviron®. Testosterone propionate was also the first commercially available injectable testosterone ester on the prescription drug market in the United States, and before 1960 was still the main form of injectable testosterone-like products in the world. For example, in the early 1950s, when steroids were first tested by a small number of American athletes, the only anabolic/androgenic steroids readily available on the market were methyltestosterone, testosterone propionate and aqueous testosterone (testosterone suspension) .

**Application:**

In the medical field:

Early prescription guidelines for testosterone propionate have many therapeutic uses. It is mainly used in male cases of androgen insufficiency, as well as problems usually surrounding low testosterone levels, such as decreased libido and impotence in adults, and undescended testicles in adolescents and young adults.

Testosterone propyl acid has also been used to treat menopause, menorrhagia (heavy menstrual bleeding), menstrual strain, chronic cystic mastitis (fibrocystic breast), endometriosis, and hyperlactation, and other conditions that include the use of the male hormone testosterone. For female patients.

Over the years, these broad guidelines were scaled back by the FOOD and Drug Administration, but by the 1980s, testosterone propionate was used mainly in male patients. Testosterone propionate has long been available in the United States and other countries, and is still a very common form of testosterone on the global market.

Package and Shipping of White Powder Testosterone Cypionate for Preventing Osteoporosis

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg:inner: Double PE bags; Outside: 25kg/ fibre drum

shipping:

With 3-5 days after your payment

FAQ of White Powder Testosterone Cypionate for Preventing Osteoporosis

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
