

99% HPLC Testosterone Powder Test Enanthate for Weight Loss CAS 315-37-7

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 5000kg/Month

Product Specification

- Product: Testosterone Enanthate
- Other Name: Test Enanthate
- Apperance: White Powder
- Cas No: 315-37-7
- MF: C₂₆H₄₀O₃
- MW: 400.6
- Purity: 99%min
- MOQ: 1KG
- Highlight: **HPLC Testosterone Powder,
CAS 315-37-7 Testosterone Powder ,
Weight Loss Test Enanthate Powder**

Product Description

Testosterone Enanthate /Test Enanthate Steroids Powder For Weight Loss Cas 315-37-7

Brief Introduction:

Testosterone heptanate is a long-acting product of testosterone injection. Heptanate continues to release testosterone into the bloodstream for approximately 2 to 3 weeks after deep intramuscular injection. In order to maintain normal physiological levels of testosterone during androgen replacement therapy (TRT), an injection of T heptanate is usually required at least once every two weeks, and most doctors in medical practice prefer weekly injections. Testosterone heptanoate, like all testosterone injections, is favored by athletes for its ability to increase muscle mass and strength.

Testosterone Enanthate is one of the most popular form of testosterone prescribed everywhere in the world. Testosterone Enanthate steroids are very concentrated forms of hormonal substance that is why it can boost the levels of testosterone in the body very quickly. Athletes take exogenous testosterone to increase muscle strength and size.

Basic Information form:

Product Name	99% HPLC Testosterone Powder Test Enanthate for Weight Loss CAS 315-37-7
Cas No.	315-37-7
Assay	99%
Appearance	White powder
MF	C ₂₆ H ₄₀ O ₃
Molecular Weight	400.6
Melting point	34 ~ 39°C

Product Image:

**Application:**

In the medical field:

Testosterone heptanate is most commonly used clinically to maintain normal levels of testosterone required by adult men with low androgen levels. Low androgen levels are a sign of low libido, weak muscle mass and lethargy. Testosterone heptanate is also used to treat testicular dysplasia and delayed puberty in adolescent males.

Function:

For Man

Applied to sexual inadequacy, sex organ dysplasia, infertility, cryptorchidism and infertility.

For Woman

Functional uterine bleeding

Climacteric syndrome

Breast cancer

Genital cancer

Liver cirrhosis

Aplastic anemia

Osteoporosis

Other wasting disease
