

CAS 315-37-7 99% Muscle Building Steroid Powder Testosterone Enanthate

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Product: Testosterone Enanthate
- Other Name: Test Enanthate
- Color: White
- CAS: 315-37-7
- MF: C₂₆H₄₀O₃
- Molecular Weight: 400.6
- Assay: 99%Min
- MOQ: 1KG
- Highlight: **White Testosterone Enanthate Steroids, CAS 315-37-7 Testosterone Enanthate Steroids, 99% muscle building powder**

Product Description

CAS 315-37-7 99% Muscle Building Steroid Powder Testosterone Enanthate

Basic Information form:

Product Name	CAS 315-37-7 99% Muscle Building Steroid Powder Testosterone Enanthate
Cas No.	315-37-7
Assay	99%
Appearance	White powder
MF	C ₂₆ H ₄₀ O ₃
Molecular Weight	400.6
Melting Point	34 ~ 39°C

Brief Introduction:

Testosterone Enanthate is one of the oldest and perhaps the most commonly used anabolic steroid of all time. Testosterone Enanthate is a slow acting release form of the testosterone hormone and would be the first large/long ester testosterone form used. Synthetic testosterone itself would be developed in the 1930's. The first batches of testosterone manufactured would have no ester attached (Testosterone Suspension) and needless to say would be fast acting and require very frequent injections. In 1937 the first ester controlled testosterone would hit the market thanks to Schering and their new Testosterone Propionate product. This would allow for more control over the testosterone hormone by regulating its time release. However, in the early 1950's a larger ester in Enanthate would be attached to the hormone thereby slowing down the hormone's activity even more. Testosterone Enanthate would become the dominating testosterone form in the medical field and Testosterone Cypionate would join a few years later. The difference in Testosterone Enanthate and Testosterone Cypionate is largely inconsequential.

**Application:**

For Medical Field:

Testosterone Enanthate is most commonly used clinically to maintain the normal levels of testosterone needed by adult men whose androgen levels are too low. Low androgen levels are characterized by low libido, emaciation, small muscle mass, and daily mental drowsiness. Testosterone Enanthate is also used to treat abnormal testicular development and delayed puberty in adolescent males.

For Sports Field:

Testosterone Enanthate is best suitable for muscle builders and sportsmen looking to gain the advantages of efficiency improving medications without the severe adverse reactions.

Function:

For Man

Applied to sexual inadequacy, sex organ dysplasia, infertility, cryptorchidism and infertility.

For Woman

Functional uterine bleeding

Climacteric syndrome

Breast cancer

Genital cancer

Liver cirrhosis

Aplastic anemia

Osteoporosis

Other wasting disease.

Package and Shipping of CAS 315-37-7 99% Muscle Building Steroid Powder Testosterone Enanthate

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

shipping:

With 3-5days after your payment

FAQ of CAS 315-37-7 99% Muscle Building Steroid Powder Testosterone Enanthate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
