

99% Testosterone Enhancing Crystalline Raw Powder Testosterone Cypionate

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Testosterone Cypionate
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 3000kg/Month

Product Specification

- Name: Testosterone
- MF: C27H40O3
- MW: 412.6
- Purity: 99%
- Appearance: White Or Quasi-white Crystalline Powder
- Storage: 2-8
- Highlight: **crystalline Infertility Treatment Testosterone Enhancing Powder**
, crystalline Testosterone Enhancing Powder ,
99% Raw Testosterone Cypionate Powder

Product Description

99% Testosterone Enhancing Crystalline Raw Powder Testosterone Cypionate

Testosterone cypionate (Test CYP) is widely produced worldwide, but cypionate appears to be almost exclusively a US product. Therefore, it is not surprising that American athletes particularly like this testosterone ester, which is said to produce a slightly higher moisture retention.

Cypionate has become the most popular testosterone ester on the US black market for a long time. As with all testosterone injections, a considerable increase in muscle mass and strength can be expected in one cycle.

Product Name	99% Testosterone Enhancing Crystalline Raw Powder Testosterone Cypionate
Assay	99%
Test	HPLC
CAS	58-20-8
Storage	2~8 centigrade

Application

In the treatment of low testosterone levels, prescribing guidelines for testosterone cyclopropionate call for a dose of 50-400mg every two to four weeks. Although active in the body for a long time, weekly injections of testosterone cyclopropionate are usually required for muscle growth or improved athletic performance. The usual dose is 200-600mg per week in 6-12 week cycles. That level is enough for most people to notice a significant increase in muscle size and strength. Although high doses are not generally recommended, some bodybuilders are known to use very large doses of testosterone cyclopropionate (1,000mg or more per week). This was more common before the 1990s, when testosterone was often much cheaper and easier to find than it is today. At doses of 800-1000mg or more per week, water storage may account for more excess weight gain than new muscle tissue. The practice of "large doses" is inefficient (not to mention potentially dangerous), especially when we consider the current high price of solid alcohols.

For women

Testosterone cyclopropionate is rarely used by women in clinical practice. When used, it is often used as a secondary agent during inoperable breast cancer, when other therapies have failed to produce the desired effect and ovarian function needs to be suppressed. Testosterone is not recommended for women because of its strong androgenicity, tendency to produce masculine side effects, and slow acting characteristics (making blood levels difficult to control).

Package and Shipping of 99% Testosterone Enhancing Crystalline Raw Powder Testosterone Cypionate

1. Packing:

- (1) Under 25kg: inner: PE bag then aluminum foil bag; outside: carton

(2) Over 25kg: 25kg/drum inner with double PE bags; outside with fibre drum.

2. Shipping:

3~5 days, after your payment

FAQ of 99% Testosterone Enhancing Crystalline Raw Powder Testosterone Cypionate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
