Brief Introduction:

RAD 140, also known as testosterone, is an oral bioavailable non-steroidal selective androgen receptor modulator (SARM) that increases muscle mass and enhances the action of testosterone without the adverse side effects of anabolic steroids.

The potent, orally bio-available and nonsteroidal RAD-150 is designed to make the hormonal receptors in the tissues of the body acts as if they are receiving a dose of test, setting off the same effects as prohormones and anabolic steroids minus the unwanted side effect " This statement shows the potency of RAD-150. It is also quick acting which makes it a popular choice for Stacks!
