Product Name	99% Antibiotics Powder Cefixime Cholecystitis Treatment CAS 79350-37-1
CAS	79350-37-1
Purity	99%min
MF	C ₁₆ H ₁₅ N ₅ O ₇ S ₂
MW	453.450
Storage	Keep in a cool, dry, dark location
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Cefixime (Cefixime) is a third-generation cephalosporin antibiotic for oral use. It is suitable for the treatment of respiratory, urinary and biliary infections caused by sensitive bacteria. Cefixime is highly stable to β -lactamase produced by gram-negative bacilli. Its antibacterial effect on gram-negative bacilli is stronger than that of the first and second-generation cephalosporins, and its antibacterial effect on gram-positive cocci is not as good as that of the first and second-generation cephalosporins. The second generation cephalosporin.

Product Image:
