

CAS 79350-37-1 Medical Antibiotics Powder Cefixime for Pneumonia Treatment

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Cefixime
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Name: Cefixime
- CAS: 79350-37-1
- MW: 453.450
- MF: C₁₆H₁₅N₅O₇S₂
- Appearance: White Powder
- Purity: 99%Min
- Shelf Life: 2 YEARS
- Storage: 2~8 Centigrade
- Highlight: CAS 79350-37-1 Medical Antibiotics Powder,
CAS 79350-37-1 Antibiotics Powder,
Pneumonia Treatment CAS 79350-37-1 cefixime
powder

Product Description

CAS 79350-37-1 Medical Antibiotics Powder Cefixime for Pneumonia Treatment

Basic Information:

Product Name	CAS 79350-37-1 Medical Antibiotics Powder Cefixime for Pneumonia Treatment
CAS	79350-37-1
Purity	99%min
MF	C ₁₆ H ₁₅ N ₅ O ₇ S ₂
MW	453.450
Storage	Keep in a cool, dry, dark location
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Cefixime (Cefixime) is the third generation of cephalosporin antibiotics for oral use, which is suitable for the treatment of respiratory, urinary and biliary tract infections caused by sensitive bacteria. Cefixime is highly stable to β -lactamase produced by gram-negative bacilli, and its antibacterial effect on gram-negative bacilli is stronger than that of the first generation and the second generation cephalosporins, while its antibacterial effect on gram-positive cocci is inferior to that of the first generation and the second generation cephalosporins. At present, cefixime drugs approved by the State Food and Drug Administration include tablets, capsules, dispersible tablets, dry suspension and granules, all of which are prescription drugs.

Product Image:

Medical uses

Cefixime treats infections of the:

Ear: Otitis caused by *Haemophilus influenzae*, *Moraxella catarrhalis* and *Streptococcus pyogenes*.

Sinuses: Sinusitis.

Throat: Tonsillitis, pharyngitis caused by *Streptococcus pyogenes*.

Chest and lungs: Bronchitis, pneumonia caused by *Streptococcus pneumoniae* and *Haemophilus influenzae*. It is also used to treat typhoid fever.

Distribution

It has high concentrations in bile and urine. It can cross the placenta and its protein binding capacity is 65%.

It is always better to perform appropriate cultures and susceptibility studies to determine the causative organism and its sensitivity to cefixime.

Function:

Cefixime is used to treat the following infections caused by sensitive bacteria:

1. Respiratory infections, such as bronchitis, pneumonia, etc.
2. Urinary system infection, such as pyelonephritis, cystitis, urethritis, etc.
3. Biliary tract infection, such as cholecystitis, cholangitis;
4. Others, such as otitis media, sinusitis, scarlet fever, etc.
3. Biliary tract infection, such as cholecystitis, cholangitis;
