CAS	64485-93-4
Purity	99%min
MF	C ₄₉ H ₈₄ N ₂ O ₁₈
MW	843.053
Storage	Keep in a cool, dry, dark location
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Spiramycin, the English name is Spiramycin. This product is white or slightly yellow powder, slightly odorous; slightly hygroscopic; this product is soluble in methanol, ethanol, acetone or ether, almost insoluble in water, and insoluble in petroleum ether. It is a macrolide antibiotic obtained from the culture medium of *Streptomyces ambofaciens*. Spiramycin is the acetate of acetylspiramycin. After oral administration, the acetyl group is removed to show strong antibacterial effect. Spiramycin is a strong bacteriostatic agent, and it has a bactericidal effect only at very high concentrations. This product has a strong antibacterial effect and antibacterial post effect (PAE) in the body, can enhance the phagocytosis of phagocytes, and is widely distributed in the body. This product has a higher concentration in tissue cells than erythromycin and has less side effects than erythromycin. This product can be used to treat ear, nose, throat and respiratory tract infections caused by gram-positive bacteria and certain gram-negative bacteria. It is suitable for the treatment of otitis media, periodontitis, acute sinusitis and other oral cavity and ear nose throat caused by sensitive bacteria. Branch infection. It can also be used to treat toxoplasmosis.

Product Image:
