

Yellow Antibiotics Powder CAS 1397-89-3 Antiprotozoal Oral Amphotericin B

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Amphotericin B
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Name: Antibiotics Powder Amphotericin B Drug For Antifungal CAS 1397-89-3
- CAS: 1397-89-3
- MW: 924.079
- MF: C₄₇H₇₃NO₁₇
- Color: Yellow
- Purity: 99%Min
- Shelf Life: 2 YEARS
- Storage: -20°C
- Highlight: **Yellow Antibiotics Powder,
CAS 1397-89-3 Antibiotics Powder,
Antiprotozoal oral amphotericin b**

Product Description

What is Antiprotozoal 99% Medicine Oral Grade Amphotericin B Powder 1397-89-3

Basic Information:

Product Name	Antiprotozoal 99% Medicine Oral Grade Amphotericin B Powder 1397-89-3
CAS	1397-89-3
Purity	99%min
MF	C ₄₉ H ₈₄ N ₂ O ₁₈
MW	924.079
Storage	-20°C
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Amphotericin B is a polyene antifungal agent with activity in vitro against a wide variety of fungal pathogens. Amphotericin B exerts its antifungal effect by disruption of fungal cell wall synthesis because of its ability to bind to sterols, primarily ergosterol, which leads to the formation of pores that allow leakage of cellular components. This affinity may also account for its toxic effects against select mammalian cells. Amphotericin B is generally considered cidal against susceptible fungi at clinically relevant concentrations.

Despite the introduction of newer antifungal agents for the treatment of systemic mycoses, amphotericin B remains the standard treatment for many severe, invasive fungal infections. However, because of toxicities associated with its intravenous use, along with the expanded availability of safer treatment options, it is frequently reserved for patients who have severe, life-threatening invasive fungal infections or who are unable to tolerate alternative antifungal agents. With the exception of neonatal candidiasis and treatment of Candida urinary tract infections, lipid-based formulations (most notably liposomal amphotericin B) have largely replaced amphotericin B deoxycholate due to their improved tolerability.

Product Image:

Application:

1. Amphotericin B can be used for antifungal.
2. Amphotericin B is a polyene antifungal drug. Fungi that are sensitive to this product include *Cryptococcus neoformans*, *Blastomyces dermatitis*, *Histoplasma*, *Coccidioides*, *Sporothrix*, *Candida*, etc. Some *Aspergillus* species are resistant to this product; skin and *Trichophyton*. Most of them are resistant.
3. Amphotericin B has no antimicrobial activity against bacteria, rickettsiae, viruses, etc.
4. Amphotericin B concentration achieved by the commonly used therapeutic dose has only bacteriostatic effect on fungi.

Package and Shipping of Antiprotozoal 99% Medicine Oral Grade Amphotericin B Powder 1397-89-3

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 work days after your payment

FAQ of Antiprotozoal 99% Medicine Oral Grade Amphotericin B Powder 1397-89-3

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
