

Veterinary Erythromycin Thiocyanate Poultry CAS 7704-67-8 Apis

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Erythromycin
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: Veterinary Apis Erythromycin Thiocyanate For Poultry CAS 7704-67-8
- CAS No: 7704-67-8
- Outlook: White Or Almost White Crystalline Or Powder
- Assay: 99%Min
- Shelf Life: 2 YEARS
- Storage Temperature: Preserve In Tight, Light-resistant Containers In A Cool Place
- Molecular Formula: C38H68N2O13S
- MW: 793.02
- Highlight: **CAS 7704-67-8 Veterinary Erythromycin Thiocyanate Poultry**
, **CAS 7704-67-8 Erythromycin Thiocyanate Poultry**
, **CAS 7704-67-8 Apis erythromycin powder**

Product Description

What is Veterinary Apis Erythromycin Thiocyanate for Poultry CAS 7704-67-8

Basic Information:

Product Name	Veterinary Apis Erythromycin Thiocyanate for Poultry CAS 7704-67-8
CAS	7704-67-8
Purity	99%min
MF	C38H68N2O13S
Storage	Preserve in tight, light-resistant containers in a cool place
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Erythromycin, an oral macrolide antibiotic produced by *Streptomyces erythreus*, reversibly binds to the 50S ribosome of bacteria, and inhibits protein synthesis. Target: Antibacterial. Erythromycin is a macrolide antibiotic that has an antimicrobial spectrum similar to or slightly wider than that of penicillin, and is often prescribed for people who have an allergy to penicillins. For respiratory tract infections, it has better coverage of atypical organisms, including *Mycoplasma* and legionellosis.

Product Image:

**Application:**

Erythromycin is clinically used as an alternative drug for penicillin allergic patients in the treatment of the following infections: acute tonsillitis, acute pharyngitis and sinusitis caused by hemolytic streptococcus and streptococcus pneumoniae; Scarlet fever and cellulitis caused by hemolytic streptococcus; Diphtheria and diphtheria carriers; Gas gangrene, anthrax, tetanus; Actinomycosis; Syphilis; Listeriosis, etc. Erythromycin is a dodecyl sulfate of erythromycin propionate, which has antibacterial activity against Staphylococcus, Streptococcus and Gram-positive bacilli. Neisseria, Haemophilus influenzae, Borutella pertussis and other bacteria may also be sensitive to the product. Etonoerythromycin also showed antibacterial activity against a variety of anaerobic bacteria except for Bacteroides fragilis and Fusobacteria. It also has an inhibitory effect on Legionella, Campylobacter foetus, some spirochetes, Mycoplasma pneumoniae, Rickettsia and Chlamydia. This strain is bacteriostatic, but also bactericidal against certain bacteria in high concentrations.

Package and Shipping of Veterinary Apis Erythromycin Thiocyanate for Poultry CAS 7704-67-8

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 work days after your payment

FAQ of Veterinary Apis Erythromycin Thiocyanate for Poultry CAS 7704-67-8

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.
