

99% Veterinary Apis Erythromycin Thiocyanate Powder for Acute Pharyngitis

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Erythromycin
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 5000kg/Month

Product Specification

- Product Name: 99% Veterinary Apis Erythromycin Thiocyanate Powder For Acute Pharyngitis
- CAS No: 7704-67-8
- Outlook: White Or Almost White Crystalline Or Powder
- Assay: 99%Min
- Shelf Life: 2 YEARS
- Storage Temperature: Preserve In Tight, Light-resistant Containers In A Cool Place
- Molecular Formula: C38H68N2O13S
- MW: 793.02

Product Description

What is 99% Veterinary Apis Erythromycin Thiocyanate Powder for Acute Pharyngitis?

Basic Information:

Product Name	99% Veterinary Apis Erythromycin Thiocyanate Powder for Acute Pharyngitis
CAS	7704-67-8
Purity	99%min
MF	C ₃₈ H ₆₈ N ₂ O ₁₃ S
Storage	Preserve in tight, light-resistant containers in a cool place
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Erythromycin Ethylsuccinate is an antimicrobial agent. This product is a veterinary drug for gram positive bacteria and mycoplasma infection; More and more as the initial raw materials used in the synthesis of erythromycin, luo erythromycin, azithromycin, clarithromycin and other large ring lactone class antibiotic.

Product Image:

**Application:**

Erythromycin is clinically used as an alternative drug for penicillin allergic patients in the treatment of the following infections: acute tonsillitis, acute pharyngitis and sinusitis caused by hemolytic streptococcus and streptococcus pneumoniae; Scarlet fever and cellulitis caused by hemolytic streptococcus; Diphtheria and diphtheria carriers; Gas gangrene, anthrax, tetanus; Actinomycosis; Syphilis; Listeriosis, etc.

Erythromycin belongs to the group of macrolide antibiotics. Erythromycin acts bacteriostatically against Gram-positive bacteria and cocci and Gram-negative meningococcus. Erythromycin is active against the following micro-organisms: Bacillus anthracis, Bordetella pertussis, Brucella melitensis, Clostridium botulinum, Cl. perfringens, Cl. tetani, Pasteurella multocida, Staphylococci, Streptococci, Corynebacterium diphtheriae, C. pyogenes, Diplococcus pneumoniae, Hemophilus influenzae, Neisseria meningitidis, Protozoa, Spirochetes and some Mycoplasmas.

Erythromycin thiocyanate is effective against infections caused by micro-organisms in poultry, sensitive for erythromycin, especially infections caused by Cocci, Mycoplasma and Pasteurella. For treatment of bacterial infections in ruminants and pigs, especially infections caused by E. coli, enteritis and respiratory infections caused by Pasteurella spp., Haemophilus spp. and Mycoplasmas.
