

White Mupirocin Wound Healing Powder 99% Skin Infections

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Mupirocin
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: 99% Topical Antibiotics Mupirocin Bactroban Powder For Skin Infections
- CAS No: 12650-69-0
- Outlook: White Or Almost White Crystalline Or Powder
- Assay: 99%Min
- Shelf Life: 2 YEARS
- Storage Temperature: Preserve In Tight, Light-resistant Containers In A Cool Place
- Molecular Formula: C₂₆H₄₄O₉C₂₆H₄₄O₉
- MW: 793.02
- Highlight: **White Mupirocin Wound Healing Powder ,
99% Mupirocin Wound Healing Powder ,
99% Skin Infections bactroban powder**

Product Description

What is 99% Topical Antibiotics Mupirocin Bactroban Powder For Skin Infections?

Basic Information:

Product Name	99% Topical Antibiotics Mupirocin Bactroban Powder For Skin Infections
CAS	12650-69-0
Purity	99%min
MF	C ₂₆ H ₄₄ O ₉
Storage	Preserve in tight, light-resistant containers in a cool place
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Mupirocin (trade names Bactroban, Centany) is an antibiotic. It is used topically and is effective against Gram-positive bacteria, including MRSA. Mupirocin is inactive for most anaerobic bacteria, mycobacteria, mycoplasma, chlamydia, yeast and fungi. Mupirocin is bacteriostatic at low concentrations and bactericidal at high concentrations. It is of the monoxycarboxylic acid class. Mupirocin is a mixture of several pseudomonic acids, with pseudomonic acid A (PA-A) constituting greater than 90% of the mixture. Also present in mupirocin are pseudomonic acid B with an additional hydroxyl group at C8, pseudomonic acid C with a double bond between C10 and C11, instead of the epoxide of PA-A, and pseudomonic acid D with a double bond at C4' and C5' in the 9-hydroxy-nonanoic acid portion of mupirocin.

**Application:**

Mupirocin is used as a topical treatment for bacterial skin infections, for example, furuncle, impetigo, open wounds, etc. It is also useful in the treatment of methicillin-resistant *Staphylococcus aureus* (MRSA), which is a significant cause of death in hospitalized patients having received systemic antibiotic therapy. It is suggested, however, that mupirocin cannot be used for extended periods of time, or indiscriminately, as resistance does develop, and could, if it becomes widespread, destroy mupirocin's value as a treatment for MRSA. It may also result in overgrowth of non-susceptible organisms.

Dosage:

For the treatment of impetigo, a small amount of the ointment is applied to the affected area, usually three times daily (every 8 hours). The area may be covered with a sterile gauze dressing. If there is no improvement in 3-5 days, the physician should be contacted to re-examine the infected area. For other skin infections, the cream is applied to the affected area 3 times a day for 10 days, and the doctor should be contacted as well if there is no improvement after 3-5 days.

When mupirocin is used for treating intranasal *Staphylococcus aureus* that are resistant to other antibiotics, patients who are age 12 years and older require the application of about half of the ointment from a single-use tube of ointment into one nostril and the other half into the other nostril. This treatment is repeated twice daily for 5 days. Currently, there is not enough information to recommend use of mupirocin in children younger than 12 years of age.

Package and Shipping of 99% Topical Antibiotics Mupirocin Bactroban Powder For Skin Infections

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 work days after your payment

FAQ of 99% Topical Antibiotics Mupirocin Bactroban Powder For Skin Infections

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
