

Infertility Treatment Body Building Peptides 99% HMG Human Menopausal Gonadotropin

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-HMG
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: 10mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: 99% White Powder Peptides Human-Menopausal Gonadotropin For Infertility Treatment
- CAS No: 61489-71-2
- Outlook: White To Off White Powder
- Assay: 99%Min
- Shelf Life: 2 YEARS
- Storage Temperature: In Cool,dry Place
- Molecular Formula: C50h69n15o9
- MW: 1024.20
- Highlight: **Infertility Treatment Body Building Peptides, off white Body Building Peptides, 99% Hmg Human Menopausal Gonadotropin**

Product Description

What is 99% Peptides Powder Human-Menopausal Gonadotropin For Infertility Treatment?

Basic Information:

MOQ	1KG

Brief Introduction:

HM"G (common name: human menopausal gonadotrop) is a gonadotropin-type drug, mainly has the role of follicle-promoting hormone (FSH) to promote

The follicles in the ovaries mature and the testicles produce and secrete steroids. So that women's endometrial hyperplasia, men promote the development of cranial tube, fertilization Cell division and sperm maturation.

The clinically appropriate dosing for hMG when used in an ART cycle without an FSH product is 450 IU/day or less for not more than 14 days of treatment. The total dose of gonadotropin (hMG and FSH) should not exceed 450 IU per day when used in any mixed stimulation protocol. When used as part of a mixed stimulation protocol (hMG + FSH) or when used alone for ovulation induction or controlled ovarian stimulation the clinically appropriate maximum dosing for hMG agents is 150 IU/day. Exceeding this daily dose and duration of treatment has not been proven to be efficacious in terms of pregnancy outcome.

Product Image:

Application:

For women with choriotropin (HCG) : for primary or secondary amenorrhea caused by insufficient gonadotropin secretion and infertility caused by anovulation.

For men: Treat primary or secondary hypogonadotropin hypogonadism and stimulate spermatogenesis.
