#### Brief Introduction:

Octreotide has also been used off-label for the treatment of severe, refractory diarrhea from other causes.

It is used in toxicology for the treatment of prolonged recurrent hypoglycemia after sulfonylurea and possibly meglitinides overdose.

It has also been used with varying degrees of success in infants with nesidioblastosis to help decrease insulin hypersecretion.

Octreotide has been used experimentally to treat obesity, particularly obesity caused by lesions in the hunger and satiety centers of the hypothalamus, a region of the brain central to the regulation of food intake and energy expenditure.
