

Blood Press Reducing Body Building Peptides DSIP Deep Sleep Inducing Peptide

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-DSIP
- Minimum Order Quantity: 1BOX
- Price: Negotiable
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: 99% Purity Delta Sleep-Inducing Peptides (DSIP) For Reducing Blood Press
- CAS: 62568-57-4
- Specification: 5mg/vial, 10vials/box
- Purity: 99%
- Molecular Weight: 848.81
- Molecular Formula: C35H48N10O15
- Appearance: White powder
- MOQ: 1BOX
- Highlight: **99% Purity Body Building Peptides, Blood Press Reducing Body Building Peptides, DSIP Deep Sleep Inducing Peptide**

Product Description

What is 99% Purity Delta Sleep-Inducing Peptides (DSIP) For Reducing Blood Press?

Basic Information Form:

Product Name	99% Purity Delta Sleep-Inducing Peptides (DSIP) For Reducing Blood Press
CAS NO.	62568-57-4
MF	C35H48N10O15
MW	848.81
EINECS NO.	unavailable
Purity	99%
Appearance	White freeze dried powder
Place of origin	China
MOQ	1box

Brief Introduction:

DSIP (Delta Sleep-inducing Peptide) is a neuropeptide found in the hypothalamus, pituitary, and adrenal glands. Its isolation has allowed for extensive research which has found several possible primary and peripheral roles of this peptide.

Delta-Sleep-Inducing Peptide (DSIP) has several physiological effects in addition to its ability to promote sleep in animals under certain conditions. These effects include modification in thermoregulation, heart rate, blood pressure, pain threshold, and in the lymphokine system. DSIP effects are circadian cycle-dependent. Moreover, some of DSIP effects appear before neurological or behavioral signs of sleep. DSIP may promote peripheral preparatory physiological mechanisms associated with sleep onset.

Product Image:

Application:

Sleep is necessary to sustain the health of human body physiological processes, the sleep quality has produced important influence on people's life and health. So the study of sleep more and more get the attention of people.

DSIP is the first have to clarify chemical structure of sleep. It had discovered that some of the biological activity and have been applied to clinical DSIP. In DSIP synthesis, solution method, solid phase method, enzymatic method, etc. Delta sleep-inducing peptide, abbreviated DSIP, is a neuropeptide that when infused into the mesodiencephalic ventricle of recipient rabbits induces spindle and delta EEG activity and reduced motor activities. Many roles for DSIP have been suggested following research carried out using peptide analogues with a greater molecular stability and through measuring DSIP-like immunological (DSIP-LI) response by injecting DSIP antiserum and antibodies.

Benefits of :DSIP

Restore disturbed sleep patterns
Promote LH and GH release
Reduce persistent/chronic pain
Modulate cortisol production

Package and Shipping of 99% Purity Delta Sleep-Inducing Peptides (DSIP) For Reducing Blood Press

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of 99% Purity Delta Sleep-Inducing Peptides (DSIP) For Reducing Blood Press

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
