

5mg/vial DSIP Bodybuilding Powder Persistent Chronic Pain Reducing

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-DSIP
- Minimum Order Quantity: 1BOX
- Price: Negotiable
- Packaging Details: 5mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Delta Sleep-Inducing Peptides (DSIP) For Reducing Persistent/Chronic Pain
- CAS: 62568-57-4
- Specification: 5mg/vial, 10vials/box
- Purity: 99%
- Molecular Weight: 848.81
- Molecular Formula: C35H48N10O15
- Appearance: White powder
- MOQ: 1BOX
- Highlight: 5mg/vial DSIP Bodybuilding,
COA DSIP Bodybuilding,
COA DSIP Bodybuilding powder pain reducing peptide

Product Description

What is Delta Sleep-Inducing Peptides (DSIP) For Reducing Persistent/Chronic pain?

Basic Information Form:

Product Name	Delta Sleep-Inducing Peptides (DSIP) For Reducing Persistent/Chronic pain
CAS NO.	62568-57-4
MF	C35H48N10O15
MW	848.81
EINECS NO.	unavailable
Purity	99%
Appearance	White freeze dried powder
Place of origin	China
MOQ	1box

Brief Introduction:

DSIP (Delta sleep-inducing peptide) is a well-known neuromodulator and natural sleep-promoting nonapeptide with many other physiologic functions. It is typically found in the brain and easily passes the blood-brain barrier. It has been discovered and heavily studied for over 40 years. It has been used for the treatment of poor sleep, pain conditions, stress-related symptoms, low testosterone (via stimulation of LH), and even sometimes as an antioxidant and anti-cancer protein. It exhibits a pronounced stress protective action and decreases stress-induced metabolic and functional disorders in human and animal organisms exposed to a variety of stresses. It has also been shown in research to improve hormone levels and physical performance.

Application:

Sleep is necessary to sustain the health of human body physiological processes, the sleep quality has produced important influence on people's life and health. So the study of sleep more and more get the attention of people.

DSIP is the first have to clarify chemical structure of sleep. It had discovered that some of the biological activity and have been applied to clinical DSIP. In DSIP synthesis, solution method, solid phase method, enzymatic method, etc. Delta sleep-inducing peptide, abbreviated DSIP, is a neuropeptide that when infused into the mesodiencephalic ventricle of recipient rabbits induces spindle and delta EEG activity and reduced motor activities. Many roles for DSIP have been suggested following research carried out using peptide analogues with a greater molecular stability and through measuring DSIP-like immunological (DSIP-LI) response by injecting DSIP antiserum and antibodies.

The Benefits of DSIP:

1. DSIP is utilized in order to help people fall asleep and stay asleep.

Delta-sleep-inducing-peptide is popular with bodybuilders who have learned about the power and potential of peptides through their training and supplementation regimens.

2. DSIP can be used on its own.

In order to help users sleep better, or it may be stacked with other peptides in order to create a well-rounded supplementation program.

3. DSIP lowers basal cortisol levels and blocks release of this negative hormone.

It also makes it easier for the body to release LH (luteinizing hormone). In addition, it makes it simpler for the body to release somatotropin due to deep sleep and to block the production of somatostatin, which is major muscle growth limiting factor.

4. DSIP can help people to manage stress.

In addition, it may have the power to alleviate the symptoms of hypothermia. It's also known as an effective means of normalizing blood pressure and contractions which are myocardial. As well, it may offer anti-oxidant benefits (slow down cell

Package and Shipping of Delta Sleep-Inducing Peptides (DSIP) For Reducing Persistent/Chronic pain

Package: 5mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Delta Sleep-Inducing Peptides (DSIP) For Reducing Persistent/Chronic pain

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
