

99% Purity Peptides Extendin-4 Exenatide Acetate Powder CAS 141732-76-

5

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Exenatide Acetate
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: 99% Purity Peptides Extendin-4 Exenatide Acetate Powder CAS 141732-76-5
- CAS No: 141732-76-5
- Outlook: White Powder
- Assay: 99.6%Min
- Molecular Formula: C186H284N50O62S
- MW: 4262.67
- Storage Temperature: -20°C
- Shelf Life: 2 YEARS
- Highlight: 99.6% Exenatide Acetate,
99.6% Purity exenatide Exenatide Acetate ,
CAS 141732-76-5 99.6% exendin 4

Product Description

What is 99% Purity Peptides Exendin-4 Exenatide Acetate Powder CAS 141732-76-5?

Basic Information:

Product Name	99% Purity Peptides Exendin-4 Exenatide Acetate Powder CAS 141732-76-5
CAS	141732-76-5
Purity	99.6%min
MF	C186H284N50O62S
Storage	-20°C
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Exendin-4 (exenatide), a 39-amino acid peptide originally isolated from the salivary glands of the Gila monster (*Heloderma suspectum*), differs from exendin-3 only in two positions close to the N-terminus. Application of exenatide causes an increase in acinar CAMP without stimulating amylase release. As an incretin mimetic, exenatide acts as agonist of the glucagon-like peptide-1 (GLP-1) receptor. As GLP-1, though with prolonged activity, exenatide augments the postprandial production of insulin and suppresses secretion of glucagon. For this reason, exenatide has found use as a medication of diabetes II.

Exenatide Acetate is a polypeptide composed of 39 amino acids. It is a long-acting glucagon-like peptide-1 receptor agonist with an IC₅₀ value of 3.22 NM.

Application:

Application of exenatide acetate causes an increase in acinar CAMP without stimulating amylase release. As an incretin mimetic, exenatide acetate acts as agonist of the glucagon-like peptide-1 (GLP-1) receptor. As GLP-1, though with prolonged activity, exenatide acetate augments the postprandial production of insulin and suppresses secretion of glucagon. For this reason, exenatide acetate has found use as a medication of diabetes II.

Exenatide is a synthetic version of Exendin-4, an insulin secretagogue with glucoregulatory effects. It displays biological properties similar to human Glucagon-Like Peptide-1 (GLP-1), a regulator of glucose metabolism and insulin secretion. Exenatide enhances glucose-dependent insulin secretion by the pancreatic beta-cell, suppresses inappropriately elevated glucagon secretion, and slows gastric emptying.

Function:

1. Improves Type 2 Diabetes
2. Fights Obesity
3. Protects The Brain
4. Has Anti-Anxiety Properties
5. Has Anti-Inflammatory and Anti-Oxidant Properties
6. Protects The Vascular System

Package and Shipping of 99% Purity Peptides Extendin-4 Exenatide Acetate Powder CAS 141732-76-5

Shipping:

With 3-5 work days after your payment

FAQ of 99% Purity Peptides Extendin-4 Exenatide Acetate Powder CAS 141732-76-5

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1 BOX.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
