

Female Enhancement Steroid Peptide Bremelanotide PT141 10mg/Vial

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-PT 141
- Minimum Order Quantity: 1BOX
- Price: Negotiable
- Packaging Details: 10mg /vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: T/T, Western Union,
- Supply Ability: 3000kg/Month

Product Specification

- Other Name: Female Enhancement Steroid Peptide Bremelanotide PT141 10mg/Vial
- Name: PT 141
- Formula: C₇H₁₅NO₄
- Weight: 177.198
- CAS: 189691-06-3
- Storage: 2~8 Centigrade
- Purity: 99%
- MOQ: One Box
- Highlight: **PT141 Female Enhancement Steroid Peptide, Bremelanotide Female Enhancement Steroid Peptide, 189691-06-3 Human Growth Peptides**

Product Description

What is Female Enhancement Steroid Peptide Bremelanotide PT141 10mg/Vial?

Basic Information Form:

Product Name	Female Enhancement Steroid Peptide Bremelanotide PT141 10mg/Vial
CAS	189691-06-3
Purity	99%
Appearance	White powder
Formula	C ₇ H ₁₅ NO ₄
Weight	177.198
Shelf Life	2 years

Brief Introduction:

PT141, also known as Bumenotide, is used to treat female sexual dysfunction, and PT-141 has shown positive Chemicalbook results in a phase clinical trial administered to normal premenopausal women. PT141 helps maintain normal libido in premenopausal women with hypoactive sexual desire disorder by activating endogenous pathways in the brain that regulate libido and sexual response.

PT141 was developed from the tanning peptide Melanotan 2, which is a synthetically produced variant of a peptide hormone naturally produced in the body that stimulates melanogenesis that is known as alpha-Melanocyte stimulating hormone.

Product Image:

PT-141

Application:

PT-141 or Bremelanotide is the generic term for a peptide being studied for its possible use in helping to improve sexual dysfunction in both men (erectile dysfunction or impotence) and women (sexual arousal disorder). PT-141 has a similar structure to Melanotan-II and is a synthetic analogue of alpha-Melanocyte stimulating hormone (α -MSH). Alpha-MSH is an endogenous peptide that has potential influence over lipid metabolism, appetite, and sexual libido. PT-141 is a potential remedy for the treatment of sexual dysfunction and studies have shown that PT-141 does not act on the vascular system like former compounds, but allegedly works by activating melanocortin receptors in the brain, therefore helping increase one's sexual stimulation.

Package and Shipping of Female Enhancement Steroid Peptide Bremelanotide PT141 10mg/Vial

Package: 10mg/vial, 10vials/box

Shipping: With 3-5days after your payment

FAQ of Female Enhancement Steroid Peptide Bremelanotide PT141 10mg/Vial

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
