

Anti-Inflammatory Muscle Building Peptide Powder BPC-157 2mg/Vials

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-BPC 157
- Minimum Order Quantity: 1 BOX
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , T/T, Western Union
- Supply Ability: 3000kg/Month

Product Specification

- Name: Anti-Inflammatory Muscle Building Peptides BPC-157 2mg/Vials
- Appearance: White Powder
- Specification: 2mg/vial, 10vials/box
- MF: C62h98N16o22
- MOQ: 1 BOX
- Purity: 99%

Product Description

What is Anti-Inflammatory Muscle Building Peptides BPC-157 2mg/Vials?

Basic Information Form:

Product Name	Anti-Inflammatory Muscle Building Peptides BPC-157 2mg/Vials
Cas No.	137525-51-0
Assay	99%
Appearance	White powder
MF	C62h98n16o22
Storage	Store at -80-20°C
Shelf Life	3 years

Brief Introduction:

BPC 157 has a strong anti-inflammatory activity in both acute and chronic inflammation models. In fact, preliminary results in clinical trials suggest that BPC 157 may become an important therapeutic tool for the treatment of inflammatory bowel disease. BPC 157 was shown to accelerate wound healing and to have a marked angiogenic effect. In addition, it significantly facilitates the healing of bone fracture in rats. This peptide also exhibits an osteogenic effect significantly improving the healing of segmental bone defect. BPC 157 accelerates the healing of transected rat Achilles tendon and transected rat quadriceps muscle.

FITC-phalloidin staining was able to demonstrate that BPC 157 induces F-actin formation in fibroblasts. Likewise, Western blot analysis was able to detect the production and activation of paxillin and FAK proteins. The western blot analysis also showed that BPC 157 increases the extent of phosphorylation of paxillin and FAK proteins without affecting the amounts produced.
