

99% Purity Peptide API White Powder Extendin-4 Exenatide Acetate

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Exenatide Acetate
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Product Name: 99% Purity Peptides API Powder Extendin-4 Exenatide Acetate
- CAS No: 141732-76-5
- Outlook: White Powder
- Assay: 99%Min
- Storage Temperature: -20°C
- Shelf Life: 2 YEARS
- Molecular Formula: C186H284N50O62S
- MW: 4262.67
- Highlight: **Pharmaceutical Grade Bodybuilding Peptides, 99% Purity Bodybuilding Peptides, Anti Aging Bodybuilding Peptides**

Product Description

What is 99% Purity Peptides API Powder Extendin-4 Exenatide Acetate?

Basic Information:

Product Name	99% Purity Peptides API Powder Extendin-4 Exenatide Acetate
CAS	141732-76-5
Purity	99.6%min
MF	C186H284N50O62S
Storage	-20°C
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Exenatide is a synthetic product of the glucagon-like peptide-1 (GLP-1) analog extendin-4, which consists of 39 amino acids. The Asn residue in the structure is prone to deamidation at high pH and high temperature to form Asp; His and Trp residues are more susceptible to oxidation; peptide bonds formed by Asp are more susceptible to hydrolysis and cleavage than other peptide bonds; except G1y All other amino acid residues are susceptible to racemization under base catalysis; under alkaline conditions, the Thr residue can be degraded by β elimination. In addition, temperature and metal ions also have an effect on beta elimination.

Exenatide acetate, with the synonyms of Extendin-4; UNII-9P1872D4OL, is one kind of white powder. This chemical belongs to the Product Categories of Peptide.

Product Image:

Application:

Application of exenatide acetate causes an increase in acinar CAMP without stimulating amylase release. As an incretin mimetic, exenatide acetate acts as agonist of the glucagon-like peptide-1 (GLP-1) receptor. As GLP-1, though with prolonged activity, exenatide acetate augments the postprandial production of insulin and suppresses secretion of glucagon. For this reason, exenatide acetate has found use as a medication of diabetes II.

Exenatide is a synthetic version of Exendin-4, an insulin secretagogue with glucoregulatory effects. It displays biological properties similar to human Glucagon-Like Peptide-1 (GLP-1), a regulator of glucose metabolism and insulin secretion. Exenatide enhances glucose-dependent insulin secretion by the pancreatic beta-cell, suppresses inappropriately elevated glucagon secretion, and slows gastric emptying.

Function:

1. Improves Type 2 Diabetes
2. Fights Obesity
3. Protects The Brain
4. Has Anti-Anxiety Properties
5. Has Anti-Inflammatory and Anti-Oxidant Properties
6. Protects The Vascular System

Package and Shipping of 99% Purity Peptides API Powder Extendin-4 Exenatide Acetate

Shipping:

With 3-5 work days after your payment

FAQ of 99% Purity Peptides API Powder Extendin-4 Exenatide Acetate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1 BOX.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
