Brief Introduction:

SEMAX is a neuropeptide developed from a short fragment of ACTH, Pro8-Gly9-Pro10 ACTH(4-10) and is a neuroactive peptide with unique neuroregulatory properties. **SEMAX** is a revolutionary addition to the arsenal of the Medical profession in combatting the disastrous effects of ischemic insults on the brain like the ones caused by Brain Stroke and closed head injuries.

SEMAX administration allows significant increases in salvaging neurons, reducing the size of infarcts and permanent damage.

SEMAX aids recovery and restitution of mental and motoric capacities after ischemic insults, improving the patient's quality of life after the insult.

SEMAX also influences the intellectual capacities and memory as well as concentration of normal, healthy persons subjected to stressful working conditions, increasing their mental capacities and diminishing the index of workload.
