

99% White Powder Delta Sleep Inducing Peptide DSIP CAS 62568-57-4

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-DSIP(Delta Sleep Inducing Peptide)
- Minimum Order Quantity: 1BOX
- Price: Negotiable
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 5000kg/Month

Product Specification

- Name: 99% White Powder Delta Sleep Inducing Peptide DSIP CAS 62568-57-4
- CAS: 62568-57-4
- MW: 848.81
- MF: C35H48N10O15
- Specification: 2mg/vial, 10vials/box
- Outlook: White Freeze Dried Powder
- MOQ: 1BOX
- Assay: 99%
- Highlight: Delta Sleep Inducing Peptide,
CAS 62568-57-4 Sleep Inducing Peptide,
DSIP Sleep Inducing Peptide

Product Description

What is 99% White Powder Delta Sleep Inducing Peptide DSIP CAS 62568-57-4?

Basic Information Form:

Product Name	99% White Powder Delta Sleep Inducing Peptide DSIP CAS 62568-57-4
CAS NO.	62568-57-4
MF	C ₃₅ H ₄₈ N ₁₀ O ₁₅
MW	848.81
EINECS NO.	unavailable
Purity	99%
Appearance	White freeze dried powder
Place of origin	China
MOQ	1box
Storage	below -18° C

Brief Introduction:

Delta sleep-inducing peptide was first discovered in 1974 by the Swiss Schoenenberger-Monnier group who isolated it from the cerebral venous blood of rabbits in an induced state of sleep. It was primarily believed to be involved in sleep regulation due to its apparent ability to induce slow-wave sleep in rabbits, but studies on the subject have been contradictory.

Delta-sleep-inducimng peptide (DSIP)-like aterial has been found in human breast milk.

Product Image:

Application:**For clinical:**

Sleep is necessary to sustain the health of human body physiological processes, the sleep quality has produced important influence on people's life and health. So the study of sleep more and more get the attention of people.

DSIP is the first have to clarify chemical structure of sleep. It had discovered that some of the biological activity and have been applied to clinical DSIP. In DSIP synthesis, solution method, solid phase method, enzymatic method, etc.

Function:

DSIP (Delta Sleep-inducing Peptide) is a neuropeptide found in the hypothalamus, pituitary, and adrenal glands. Its isolation has allowed for extensive research which has found several possible primary and peripheral roles of this peptide.

First, DSIP has been shown to induce sleep. Second, it may have benefits as an analgesic in treatment of chronic pain, sometimes as an adjunct treatment. Third, DSIP has been shown to block ACTH release and decrease levels of ACTH, stimulate LH release, and act as an inhibitor of the secretion of somatostatin.

The source of production of DSIP is yet unknown; It may be produced in the central nervous system or in a peripheral organ. It is thought to pass through the blood-brain barrier (BBB) more easily than most known neuropeptides. As mentioned, DSIP has shown positive results in inducing slow-wave EEG (sleep).

It has been shown to help treat narcolepsy and restore disturbed sleep patterns to normal sleep rhythms.

Package and Shipping of 99% White Powder Delta Sleep Inducing Peptide DSIP CAS 62568-57-4

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

**FAQ of 99% White Powder Delta Sleep Inducing Peptide DSIP CAS 62568-57-4**

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is one box.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment.

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, etc.
