

Medical Grade Nootropic Powder Magnesium L Threonate For Anti-Depression

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Magnesium L-Threonate
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Name: Medical Grade Nootropic Powder Magnesium L-Threonate For Anti-Depression
- CAS: 778571-57-6
- Appearance: White Powder
- Purity: 99%
- Shelf Life: 2 YEARS
- Storage: In Cool, dry Place
- MF: $C_8H_{14}MgO_{10}$
- Molecular Weight: 294.49576
- Highlight: Medical Grade Nootropic Powder, Anti Depression Magnesium L Threonate, White Powder Magnesium L Threonate

Product Description

What is Medical Grade Nootropic Powder Magnesium L-Threonate for Anti-Depression?

Basic Information:

Product Name	Medical Grade Nootropic Powder Magnesium L-Threonate for Anti-Depression
CAS	778571-57-6
Purity	99%
MF	C8H14MgO10
MW	294.49576
Storage	2-8
Deliver Time	Within 3 Days After Receiving The Payment
MOQ	1KG

Brief Introduction:

Magnesium deficiency afflicts a large percentage of the human population; American women in particular only consume 68% of the recommended amount of magnesium per day. This is a problem because magnesium is a key nutrient for ensuring that the brain operates at maximum capacity. This compound is able to influence memory and learning by enhancing synaptic plasticity.

Product Image:

Application:

Magnesium L-threonate is often used for its potential brain benefits and may help manage certain brain disorders, such as depression and age-related memory loss.

Function:

The primary benefit of Magnesium L-Threonate is an improvement in memory. It is able to enhance synaptic density and plasticity as well as increase the overall number of neurotransmitter release sites within the brain.

This supplement is also able to improve spatial memory. In one rat study, working memory improved by 13% after 24 days of taking Magnesium L-Threonate. After 30 days of supplementation, aged rats were able to perform at the same level as their younger counterparts.

This means that while this supplement is able to enhance cognitive function in both youthful and aged subjects, it improved more so for the elderly. In fact, aged rats saw an improvement rate of 19%, which is significant when compared to the 13% improvement in younger rats. Given that elderly populations are more likely to be afflicted with memory loss, this supplement

carries powerful implications for aging individuals.
