Brief Introduction:

Noopept, a strong cognitive enhancer, was developed in Russia in the early 2000s for the treatment of alcohol induced brain damage.

A mind-turning supplement, Noopept is a powerful substance which is able to cross the blood brain barrier. It works primarily by binding to glutamate receptors and exerting strong neuroprotective effects on the brain. Its high bio-availability also means it is fast acting and may have a cumulative effect.

While it is most well known as a brain supplement, Noopept also increases coordination and improves mood. It is able to help fight fatigue and avoid withdrawals with no noticeable side effects. It makes a great study aid, since it will not cause insomnia.

Some research also indicates that this supplement may help to prevent oxidation damage to the brain. It also works to treat alcohol related brain damage (this was actually the original purpose for its development).

Application:

Noopept is a racetam considered up to 1,000 times stronger than piracetam.

Noopept acts as a neuroprotectant and increases memory.

Noopept is one of the most advanced nootropics available on the market today.

Function:

Increased creativity,

Improved mood,

Reduced stress,

Augmented levels of focus and motivation,

Higher levels of verbal acuity (I particularly notice this),

Higher self-esteem (as everything seems easier)
