Brief Introduction:

Citicoline Sodium, also known as cytidine diphosphate-choline (CDP-Choline) & cytidine 5'-diphosphocholine. It is an intermediate in the generation of phosphatidylcholine from choline. Studies suggest that CDP choline supplementation helps prevent memory impairment resulting from poor environmental conditions.

Application:

Citicoline Sodium is a nutrient actually found in the body in addition to being a nutritional supplement. It is a water soluble compound that is an essential intermediary in the synthesis of phosphatidylcholine, which is a major component of grey matter brain tissue. It also helps to create a number of other types of phospholipids, which are essential components in cell membranes. This supplement was first developed in Japan, used to help people who had suffered a specific type of stroke to better recover. It was also noted that this supplement has shown promise for helping patients who are suffering from glaucoma. It appears capable of nourishing nerves as well as improving blood circulation within the brain.

Function:

Citicoline Sodium can reduce the resistance of blood vessel of brain and accelerate substance metabolism of brain. It also can activate the mechanism of reticular formation of brain stem. It can be used in the therapy of acute craniocerebral trauma and disturbance of consciousness after brain operation.
