

IDRA 21 Pharmaceutical Raw Materials For Improving Memory CAS 22503-72-6

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-IDRA 21
- Minimum Order Quantity: 1KG
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25KG/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: Western Union, T/T,
- Supply Ability: 4000kg/Month

Product Specification

- Name: Pharmaceutical Raw Materials IDRA 21 For Improving Memory CAS 22503-72-6
- CAS: 22503-72-6
- Outlook: White Powder
- Assay: 99%
- Shelf Life: 24 Months
- Storage: 2-8
- Molecular Formula: C₈H₉CIN₂O₂S
- MW: 232.69
- Highlight: **IDRA 21 Pharmaceutical Raw Materials,
CAS 22503-72-6 Pharmaceutical Raw Materials,
C₈H₉CIN₂O₂S Pharmaceutical Raw Materials**

Product Description

What is Pharmaceutical Raw Materials IDRA 21 for Improving Memory CAS 22503-72-6 ?

Basic Information:

Product Name	Pharmaceutical Raw Materials IDRA 21 for Improving Memory CAS 22503-72-6
CAS	22503-72-6
Purity	99%
MF	C ₈ H ₉ CIN ₂ O ₂ S
MW	232.69
Storage	2-8
Deliver Time	Within 3 Days After Receiving The Payment
MOQ	1KG

Brief Introduction:

IDRA-21 shows nootropic effects in animal studies, significantly improving learning and memory. It is around 10-30 times more potent than aniracetam in reversing cognitive deficits induced by orscopolamine, and produces sustained effects lasting for up to 48 hours after a single dose. The mechanism for this action is thought to be through promoting the induction of long-term potentiation between synapses in the brain.

IDRA-21 does not produce neurotoxicity under normal conditions, although it may worsen neuronal damage following global ischemia after stroke or seizures.

In comparison to the benzoylpiperidine derived ampakine drugs, IDRA-21 was more potent than CX-516, but less potent than CX-546. Newer benzothiadiazide derivatives with greatly increased potency compared to IDRA-21 have been developed, but these have not been researched to the same extent, with the benzoylpiperidine and benzoylpyrrolidine CX-series of drugs being favoured for clinical development, most likely due to more favourable toxicity profiles at high doses.

Product Image:

Application:

1. Increases in cognitive ability.
2. Increased accuracy when completing tasks.
3. Increases in short term memory.
4. IDRA-21 can potentially treat schizophrenia.
5. IDRA-21 can possibly be a treatment for depression.
6. IDRA-21 has a neuroprotective effect, so it can protect the brain from age-related cognitive defects.
7. Increased alertness and wakefulness.

Package and Shipping of Pharmaceutical Raw Materials IDRA 21 for Improving Memory CAS 22503-72-6

Shipping:

With 3-5 work days after your payment

FAQ of Pharmaceutical Raw Materials IDRA 21 for Improving Memory CAS 22503-72-6

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
