

## White Crystal Sarms Powder Testosterone Enanthate CAS 120511-73-

1

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY- Testosterone Enanthate
- Minimum Order Quantity: 1kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25kg/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

### Product Specification

- Name: 99% Pharmaceutical Grade Sarms White Raw Powder Testosterone Enanthate
- Other Name: Cardarine
- Appearance: White Crystal Powder
- Purity: 99% Min
- Molecular Formula: C<sub>17</sub>H<sub>19</sub>N<sub>5</sub>
- Molecular Weight: 293.366
- CAS: 120511-73-1
- MOQ: 1kg
- Highlight: **White Crystal Sarms Powder, Testosterone Enanthate Sarms Powder, Testosterone Enanthate CAS 120511-73-1**

#### Brief Introduction:

Testosterone enanthate is also known as testosterone heptanoate. It is an anabolic and androgenic steroid (AAS) drug used to treat low testosterone levels. Anabolic drugs work by building muscles, while androgenic means it enhances sex characteristics usually associated with males.

This drug has been used in medical procedures since the 1950s. It is known by a number of brand names, including Androfil, Depandro, Testrin, and Testro. As a schedule III drug, testosterone enanthate is available by prescription only.

#### Product Image:

#### Application:

In the medical field:

Testosterone heptanate is most commonly used clinically to maintain normal levels of testosterone required by adult men with low androgen levels. Low androgen levels are a sign of low libido, weak muscle mass and lethargy. Testosterone heptanate is also used to treat testicular dysplasia and delayed puberty in adolescent males.

#### Function:

**Enhanced protein synthesis:** Protein represents the major building blocks of muscle tissue, and synthesis represents the rate at which cells build proteins. The rate of synthesis was enhanced by testosterone heptanoate supplementation. This promotes higher levels of anabolic activity and increases the body's ability to recover.

**Enhanced nitrogen retention:** By enhancing nitrogen retention, we protect the anabolic atmosphere and enhance it to some extent. All lean muscle tissue is composed of about 16% nitrogen, and when levels drop, this leads to a catabolic (muscle wasting) state. By maintaining a positive nitrogen balance, we maintain more anabolism. This will increase the tissue's ability

to grow and is necessary when dieting to protect lean muscle tissue.

**Increase red Blood Cell Count:** By increasing our red blood cell count, we greatly increase our muscular endurance. This is because red blood cells are responsible for carrying oxygen through the blood. Greater blood oxidation equates to greater output, more endurance, and even plays a role in recovery. **Increased IGF-1 production:** Insulin-growth factor-1 (IGF-1) is a naturally occurring protein hormone (peptide) produced primarily by the liver. This hormone is very anabolic and affects almost all cells in the body. It is also directly related to human growth hormone (HGH) because HGH mainly regulates its production. The hormone also plays a powerful role in the body's ability to heal and restore muscle tissue, cartilage, nerves, tendons, ligaments and even our central nervous system in many other areas.

**Glucocorticoid inhibition:** Glucocorticoid is a naturally occurring steroid hormone; However, they are not anabolic. In fact, glucocorticoids are catabolic (muscle atrophy) because they destroy muscle tissue and promote fat gain. Cortisol is the best known glucocorticoid or because they are often known as the stress hormone. These kinins are necessary for the body to a certain extent, but not in large quantities. By inhibiting these kinins, we again promote a stronger body anabolic environment.

#### **Package and Shipping of 99% Pharmaceutical Grade Sarms White Raw Powder Testosterone Enanthate**

##### **Package:**

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

##### **Shipping:**

With 3-5days after your payment

#### **FAQ of 99% Pharmaceutical Grade Sarms White Raw Powder Testosterone Enanthate**

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
