

CAS 10418-03-8 Sarms White Trenbolone Enanthate C₂₁H₃₂N₂O

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY- Trenbolone Enanthate
- Minimum Order Quantity: 1kg
- Price: Negotiable
- Packaging Details: Aluminum Bag or 25kg/Fibre Drum
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 4000kg/Month

Product Specification

- Name: 99% Purity Pharmaceutical Grade Sarms Raw Powder Trenbolone Enanthate
- Other Name: Cardarine
- Appearance: White Crystal Powder
- Purity: 99% Min
- Molecular Formula: C₂₁H₃₂N₂O
- Molecular Weight: 328.492
- CAS: 10418-03-8
- MOQ: 1kg
- Highlight: **Sarms White Trenbolone Enanthate, Trenbolone Enanthate C₂₁H₃₂N₂O, Trenbolone Enanthate CAS 10418-03-8**

Product Description

What is 99% Purity Pharmaceutical Grade Sarms Raw Powder Trenbolone Enanthate?

Basic Information form:

Product Name	99% Purity Pharmaceutical Grade Sarms Raw Powder Trenbolone Enanthate
Cas No.	10540-29-1
Assay	99%
Appearance	White powder
MF	$C_{21}H_{32}N_2O$
Shelf Life	2 years
MOQ	1kg

Brief Introduction:

Trenbolone Enanthate, often referred to domestically as Tren-E, is an extremely powerful anabolic steroid. It can be used interchangeably with Trenbolone Hexahydrobenzylcarbonate. Considering the use of heptanate, the drug will show nearly the same pharmacokinetics as testosterone heptanate, providing peak release of its steroid within the first few days after injection and then decreasing levels for approximately 2 weeks. The base steroid here, bublon, is a derivative of Nalone, with powerful anabolic and androgenic properties. On a mg basis, it is far more potent than basic solid alcohols such as testosterone. Nor can it be converted to estrogen, but it has significant progesterone activity.

Application:

[1] Enhanced protein synthesis:

Protein is the main building block of muscle. It's not the only factor in muscle growth, but it's a major one. Heptanoic acid group of drug can improve the speed and efficiency of cells build proteins, with the increase of protein synthesis, there will be more protein for maintaining body function and promote muscle growth, this greatly increased the anabolic environment of the body, also greatly improves the overall recovery rate, this is very important to add muscle, not only is it important to add muscle during The effect of heptanohydrin on the retention of lean body weight during fat loss is also very significant and important.

[2] Enhanced nitrogen retention:

All muscle tissue consists of about 16% nitrogen. As nitrogen levels go down, this can lead to catabolism, what you call muscle loss. The more nitrogen we retain in our muscles, the better our anabolism and recovery will be.

[3] Increased red blood cell levels:

Red blood cells carry oxygen, and an increase in red blood cell levels also increases blood oxygenation levels. Our blood oxygen levels increase, which greatly improves muscle endurance. At the same time, it will more effectively promote the recovery of muscle training after injury, and even visually make our blood vessels clearer and muscles fuller

Package and Shipping of 99% Purity Pharmaceutical Grade Sarms Raw Powder Trenbolone Enanthate

Package:

Under 25kg: inner: A PE bag in aluminum foil bag; Outside: carton

Over 25kg: inner: Double PE bags; Outside: 25kg/ fibre drum

Shipping:

With 3-5 days after your payment

FAQ of 99% Purity Pharmaceutical Grade Sarms Raw Powder Trenbolone Enanthate

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1kg.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
