Brief Introduction of Sermorelin Hgh

Sermorelin, the markets leading Growth Hormone Releasing Peptide (GHRP) is an excellent alternative to HGH therapy. Sermorelin is a synthetic peptide whose brand name is Geref or Gerel. It is an analogue of growth hormone releasing hormone or GHRH. The main goal is to stimulate the release of growth hormone from the pituitary gland. Sermorelin's discovery can be traced back to at least the 1980s and since then has been used as a way to diagnose growth hormone deficiency.

Peptides, specifically Sermorelin, trigger your body's natural Human Growth Hormone production rather than replacing your own HGH with bio-identical hormones, which is a cheaper alternative to HGH therapy. Growth hormone-releasing peptides naturally occur in your body. We just give you a little boost to help you along on your journey to total health and wellness.

Peptides are amino acid chains that help the body perform basic functions. From cell renewal to the production of growth hormones, peptides are little linked chains that can make or break how your body responds to a variety of treatments. With healthy HGH production as a result of Sermorelin, your body will be healthy and vital as ever (if not stronger!).
