

Pure Polypeptide Oxytocin Peptide Hormone 2mg 99%

Our Product Introduction

for more products please visit us on peptide-powder.com

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: COA, HPLC MR
- Model Number: HBY-Oxytocin
- Minimum Order Quantity: 1 box
- Price: US \$ 30-40 / box
- Packaging Details: 2mg/vial, 10vials/box
- Delivery Time: 3-5 work days after your payment
- Payment Terms: , Western Union, T/T
- Supply Ability: 3000kg/Month

Product Specification

- Name: Oxytocin 2mg
- Synonyms: OXYTOCIN; Pitocin; Ocytocin; Syntocinon
- CAS No.: 50-56-6
- Molecular Formula: C43H66N12O12S2
- Molecular Weight: 1007.193
- Peptide Purity: >99%
- Appearance: White Powder
- Melting Point: Melting Point 116-119°C
- Highlight: Polypeptide Oxytocin Peptide Hormone,
Oxytocin Peptide Hormone 2mg,
Pure Growth Hormone Polypeptide

Product Description

High Quality Pure 99% Polypeptide Hormone Peptide Oxytocin 2mg

Basic Information Form of Oxytocin 2mg

Product Name	Oxytocin 2mg
CAS NO.	50-56-6
Synonyms	OXYTOCIN; Pitocin; Ocytocin; Syntocinon
Molecular Weight	1007.193
Molecular Formula	C ₄₃ H ₆₆ N ₁₂ O ₁₂ S ₂
Aspect	White Powder
Purity	99%
MOQ	5box
Stability	2 years

Brief Introduction of Oxytocin 2mg

Oxytocin is a [peptide hormone](#) and [neuropeptide](#) normally produced in the [hypothalamus](#) and released by the [posterior pituitary](#). It plays a role in [social bonding](#), [reproduction](#), [childbirth](#), and the [period after childbirth](#). Oxytocin is released into the bloodstream as a hormone in response to [sexual activity](#) and during labour. It is also available in [pharmaceutical form](#). In either form, oxytocin stimulates uterine contractions to speed up the process of childbirth. In its natural form, it also plays a role in [bonding with the baby](#) and [milk production](#). Production and secretion of oxytocin is controlled by a [positive feedback](#) mechanism, where its initial release stimulates production and release of further oxytocin. For example, when oxytocin is released during a contraction of the uterus at the start of childbirth, this stimulates production and release of more oxytocin and an increase in the intensity and frequency of contractions. This process compounds in intensity and frequency and continues until the triggering activity ceases. A similar process takes place during lactation and during sexual activity.

Oxytocin is derived by [enzymatic](#) splitting from the [peptide precursor](#) encoded by the human [OXT gene](#). Did you know when your baby suckles, a chemical chain reaction happens in your body that releases a hormone that not only releases your milk, but also helps you bond with your little one? That hormone is called oxytocin and, not surprising, it's called the "mothering hormone." It's also sometimes called the "love hormone" or "cuddle chemical."

Wanna know another incredible thing? Oxytocin is released in BOTH [mother's and baby's body](#) during breastfeeding!

How Oxytocin Releases Breast Milk

YOUR MILK LETDOWN

1. Your baby suckles at your breast.
2. Nerve cells in your breast send a signal to the pituitary gland in your brain to release oxytocin.
3. Oxytocin causes the muscles around your mammary glands to contract.
4. The glands contract and squeeze the breast milk into your milk ducts to be released.
5. As your baby continues to breastfeed, more oxytocin is released and breast milk continues to flow!

Product Image of Oxytocin 2mg

Application and Function of Oxytocin 2mg

Oxytocin not only helps to release your breast milk during breastfeeding, but it's also responsible for many interesting changes in your body:

- 1.causes your uterus to contract to help push out your baby during childbirth
- 2.helps your uterus to contract and shrink after labor
- 3.lowers stress and anxiety
- 4.lowers blood pressure
- 5.may protect against postpartum depression

Package and Shipping of Oxytocin 2mg

Package: 2mg/vial, 10vials/box

Shipping: With 3-5 days after your payment

FAQ of Oxytocin 2mg
