Brief Introduction of Semax For Sale

Semax is what's called a synthetic heptapeptide, meaning that it's a chain of 7 amino acids as a single molecule. Interestingly enough, the semax molecule mirrors a fragment of adrenocorticotrophic hormone, which is released in the pituitary gland of humans in response to environmental stress.

It was originally developed in Moscow, Russia as a treatment mostly for neurological-related disorders, such as poor memory, depression, ADHD, and post-stroke treatment.

It is particularly beneficial to ischemic stroke victims and individuals who have suffered other forms of head trauma but has also been used in the treatment of cognitive disorders, optic nerve disease and peptic ulcers.

Semax works by modulating receptors in the Limbic Reticular complex and for the neurotransmitters acetylcholine, dopamine, serotonin, adenosine, histamine and others. It also activates NMDA receptors for glutamate in the central and peripheral nervous system and enhances energy metabolism in your neurons.

Additionally, Semax increases synthesis of neurotrophins, proteins and biosubstrates to protect and repair neurons while also reducing inflammation. This item exhibits highly neuroprotective properties and has been recorded to increase mRNA for Nerve Growth Factor by 500% and for Brain Derived Neurotrophic Growth Factor by 800%.

★★★★★

It works miracles, only one real nootropic I found works, and I research for them for 15 years almost.
But first regarding the product itself: what I found here that the customer service is outstanding. I got aim on 24/7 response from Serena even on weekends, now you don't experience it in Europe too often. Thank u!
